

**Table S3.** Mixed analysis of variance summary table to evaluate differences in fathers' weekly average Veggie Meter® scores, total fruits and vegetables, and healthy dietary behavior scores between pre-test and post-test and between treatment (n = 35) and wait-listed control comparison (n = 46) groups.

Source of variation	<i>df</i>	<i>F</i> -value	<i>P</i>	$\eta^{2b}$
<b>Veggie Meter® scores</b>				
Group	1	1.59	0.21	0.02
Time	1	0.45	0.51	<0.01
Group*Time	1	0.00	1.0	<0.01
Total	161			
<b>Total FV<sup>a</sup></b>				
Group	1	0.38	0.54	<0.01
Time	1	3.03	0.09	<0.01
Group*Time	1	0.33	0.33	<0.01
Total	160			
<b>HDBS</b>				
Group	1	0.67	0.42	<0.01
Time	1	6.36	<b>0.01*</b>	0.02
Group*Time	1	1.03	0.31	<0.01
Total	161			

Abbreviations:  $\eta^2$ , eta squared; *df*, degrees of freedom; FV, fruits and vegetables; HDBS, healthy dietary behavior score. <sup>a</sup>One total FV outlier was removed from data analysis. <sup>b</sup>Group differences accounted for very little in each of the outcomes.
