

Supplementary Materials: Effects of Nutrient Limitation on the Synthesis of N-Rich Phytoplankton Toxins – a Meta-analysis

Karen Brandenburg, Laura Siebers, Joost Keuskamp, Thomas Jepchott and Dedmer Van de Wall

Figure S1. The natural log response ratios (RR^{Δ}) for toxin content plotted against irradiance for (a) N and (b) P limitation. (a) $R^2=0.02$, $P=0.68$, (b) $R^2= -0.03$, $P=0.71$.
