

Table S1. Method stability testing parameters and results (ng/mL) for ATX; measured results were calculated from means of fortified urine samples prepared in triplicate.

ATX Stability						
	QC Concentration	Initial Measurement	Long-term Stability	Bench-top Stability	Processed Sample Stability	Three Freeze- thaw Cycles
	25.0	24.7	23.0	23.0	27.3	22.0
% difference from initial measurement	---	---	-6.85	-6.90	10.6	-10.9
	100	96.3	89.4	99.6	103	94.9
% difference from initial measurement	---	---	-7.16	3.4	6.47	-1.44
