In the original publication [1], there was a mistake in *Equation (8)* as published. Given the angle definition in the publication, “ $\cos \theta$ ” in *Equation (8)* should be “ $\sin \theta$ ”. The corrected *Equation (8)* is shown below.

$$m\lambda = n_{eff}\sqrt{x^2 + y^2} - xn_0 \sin \theta \quad (8)$$

The authors apologize for any inconvenience caused and state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
