

Figure S7: Dose-response experiments of HepG2 and Huh7 cell lines incubated for 24-72 h with different doses of EVOO. The indicated concentrations refer to the amount of OC present in the phenol extract. The results are representative of three experiments. Data are presented as mean \pm SD. (a $p<0,05$, b $p<0,01$, c $p<0,001$ vs Co).
