

Supplementary Data: The New Genetic Landscape of Cushing's Disease: Deubiquitinases in the Spotlight

Silviu Sbiera, Meik Kunz, Isabel Weigand, Timo Deutschbein, Thomas Dandekar and Martin Fassnacht

Figure S1. Alternative incidence of published recurrent somatic mutations associated with Cushing's disease when considering only the results from next generation sequencing.

Figure S2. Schematic representation of all non-synonymous mutations identified by next generation sequencing until now in Cushing's disease.

Supplementary Table S1. See separate file.
