

Supplementary Materials: Acid-Producing Diet and Depressive Symptoms among Breast Cancer Survivors: A Longitudinal Study

Tianying Wu, Fang-Chi Hsu and John P. Pierce

Figure S1. Joint associations of PRAL and activity with depression. Covariates in the multivariable model included body mass index, physical activity, living alone status, menopausal status at baseline, number of comorbidities at baseline, total calorie intake, and intakes of vitamin B12. Abbreviations: PRAL: potential renal acid load.
