

Supplementary Figure 1. Comparison of Kaplan-Meier survival analysis between EV lincRNA-p21 expression and time to relapse (TTR) and overall survival (OS) in paired tumor-draining pulmonary vein and peripheral vein samples (n=44). **(A)** TTR according to pulmonary vein EV lincRNA-p21 expression. **(B)** TTR according to peripheral vein EV lincRNA-p21 expression. **(C)** OS according to pulmonary vein EV lincRNA-p21 expression. **(D)** OS according to peripheral vein EV lincRNA-p21 expression.
