

Table S2: The response of PCa-associated mutants to increasing concentrations of steroids (dihydrotestosterone, progesterone, estradiol and hydrocortisone) and AR antagonists (bicalutamide, enzalutamide and darolutamide).

AR mutant	Activation				Inhibition		
	Dihydrotestosterone	Progesterone	Estradiol	Hydrocortisone	Bicalutamide	Enzalutamide	Darolutamide
WT-AR							
T576A							
K581R							
A587V							
A588S							
L595M
