

Supplementary information – IMMUNOBLOTS USED IN THE GENERATION OF FIGURES

**Supplementary figure W1.** Immunoblots from D283 medulloblastoma cells treated with THC and CBD. Each membrane is labelled with the antibody target used and the sections of the immunoblot used to generate Figure 4 are indicated by the black box.

**Supplementary figure W2.** Immunoblots from D425 medulloblastoma cells treated with THC and CBD. Each membrane is labelled with the antibody target used and the sections of the immunoblot used to generate Figure 4 are indicated by the black box.

**Supplementary figure W3.** Immunoblots from PER547 medulloblastoma cells treated with THC and CBD. Each membrane is labelled with the antibody target used and the sections of the immunoblot used to generate Figure 4 are indicated by the black box.
