

Supplementary Information

Figure S1. Kendall's correlation between age and TPS levels in healthy controls (n = 328).

Figure S2. Circulating TPS levels stratified into groups according to (A) follow-up time from sample date to PDAC diagnosis, or (B) follow-up time from sample date to time of death, along with TPS levels at diagnosis. The healthy controls (Ctrl) include only the pre-diagnostic controls. y = years, m = months.
