

Supporting Information

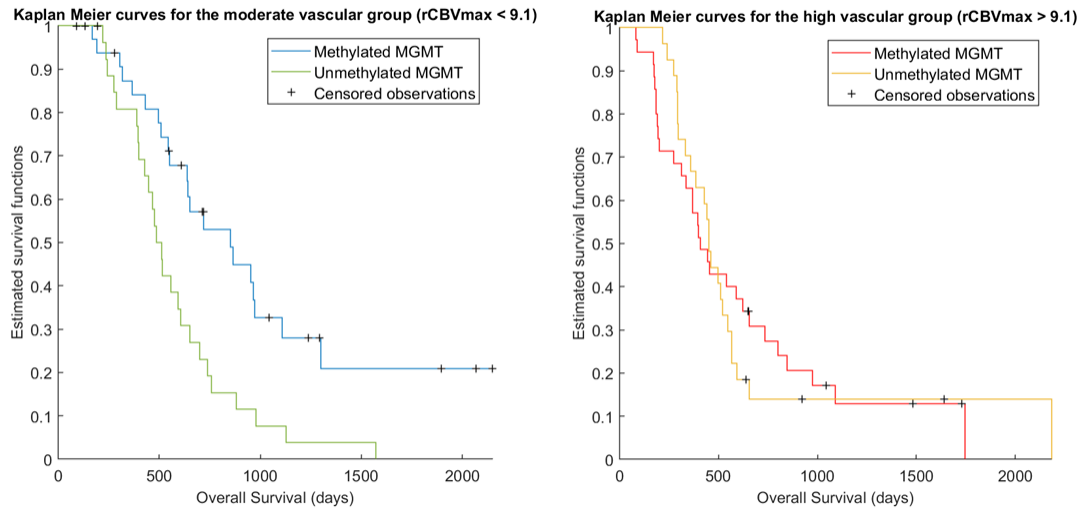

Figure S.1A: Kaplan Meier curves for the moderate vascular group (left) and for the high vascular group (right) depending on the *MGMT* methylation status. Vascular groups are defined by the threshold of the study cohort: median $rCBV_{max}$ (th = 9.1).

Figure S.1B: Kaplan Meier curves for the moderate vascular group (left) and for the high vascular group (right) depending on the *MGMT* methylation status. Vascular groups are defined by the threshold proposed in the previous study (49) (th = 10.7).
