

Supplementary Figure 6

A.

Cell Line	Platinum Sensitivity
OVCAR3	Sensitive
OVCAR4	Intermediate
OAW28	Resistant
Kuramochi	Resistant
OVCAR8	Resistant
SKOV3	Intermediate
SNU-119	Resistant
CaOV3	Intermediate

Data summarized from:
Beaufort et al. PLoS ONE. 2014 Sep 17
Haley et al. Oncotarget. 2016 Apr 27;7(22):32810–20.

Supplementary Figure 6. Viability plots for human ovarian cancer cell lines tested in the in vitro 3D miniring organoid drug assay. (A) Platinum sensitivity for each cell line was extracted from literature as indicated (24, 25). (B) Cell viability data for all ovarian cancer cell lines tested using the in vitro 3D miniring organoid drug assay. Data shown represent an average of 5 independent platings by 2 separate investigators.
