

Supplementary materials: Potential to Improve Therapy of Chronic Myeloid Leukemia (CML), Especially for Patients with Older Age: Incidence, Mortality, and Survival Rates of Patients with CML in Switzerland from 1995 to 2017

Michael Daskalakis, Anita Feller, Jasmine Noetzli, Nicolas Bonadies, Volker Arndt, Gabriela Maria Baerlocher and the NICER Working Group

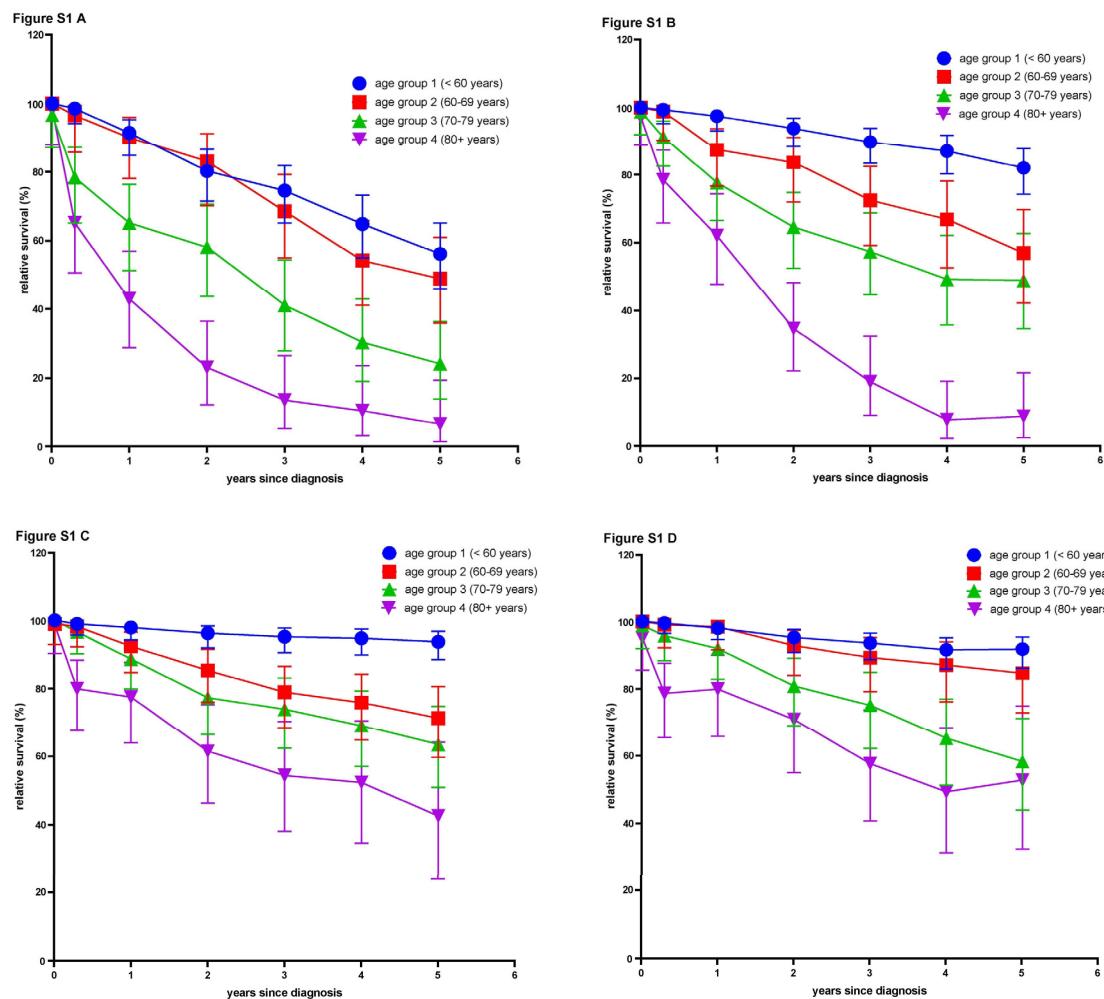

Figure S1. Relative survival time of CML patients in Swiss CCRs grouped by age and time periods: (A), relative survival time of CML patients in Swiss CCR of time period 1 (1995–2000); (B), relative survival time of CML patients in Swiss CCR of time period 2 (2001–2006); (C), relative survival time of CML patients in Swiss CCR of time period 3 (2007–2012); (D), relative survival time of CML patients in Swiss CCR of time period 4 (2013–2017).

Table S1: Incidence of CML, 1995–2000, 2001–2006, 2007–2012, and 2013–2017.

* Incidence: mean annual case frequency extrapolated to the whole Swiss population from cases observed in the cancer registries. Discrepancies between the sum and total number of expected cases are caused by rounding errors. CIR: crude rates per 100'000 py. ASR: age-standardized incidence-rates per 100,000 py (old European standard).

Table S2: Mortality of CML, 1995–2000, 2001–2006, 2007–2012, and 2013–2017.

⁴ Smith AG et al., BMJ Open 2014 Jan [4]	UK, Haematological Malignancy Research Network	2004–2011	242			0.89 (2004– 2011)		
⁵ Beinortas T et al., BMC Cancer 2016 Mar [5]	Lithuania, National Haematological Disease Monitoring System	2000–2013	601		0.33 (2000– 2004)	0.55 (2005– 2009)	NR (2010– 2013)	
⁶ Thielen N et al., Europ J Haematol 2016 Aug [6]	Netherland Cancer Registry	1989–2012	3585	0.36 (1989– 2000)	0.69 (2001– 2006)	0.79 (2007– 2012)		
⁷ Penot A et al., Leuk Lymphoma 2015 Jun [7]	France, 5 Cancer Registries	1980–2009	781	0.44 (1980– 1986)	0.64 (1987– 1999)	0.89 (2000– 2009)		
⁸ Corm S et al., Blood 2011 Okt [8]	France, CML-Registry of Nord-Pas de Calais	1990–2007	691	0.64 (1990– 1994)	0.66 (1995– 1999)	0.88 (2000– 2007)		
⁹ Björkholm M et al., JCO June 2011 [9]	Swedish Cancer Registry	1973–2008	3173	0.21 (1973– 1979)	0.23 (1980– 1986)	0.37 (1987– 1993)	0.54 (1994– 2000)	0.80 (2001– 2008)
¹⁰ Gunnarsson N et al., Europ J Haematol 2016 Oct [10]	Swedish Cancer Registry	1970–2012	1137	0.18 (1970)			0.82 (2012)	

¹ RS was estimated using the Ederer-II-method and the period approach. The estimates are age-standardized according to ICSS Standard 1. ² RS survival was estimated using the Hakulinen-method and the cohort approach. ³ RS survival was estimated using the model-based method of Estéve 1990. ⁴ RS survival was estimated using the model-based method of Estéve 1990. ⁵ RS survival was estimated using the Ederer-II-method and the cohort approach. ⁶ RS was estimated using a cohort approach (estimation method unknown). ⁷ RS was estimated using a cohort approach (estimation method unknown). ⁸ RS was estimated using flexible parametric regression models. ⁹ RS was estimated using the Ederer-II-method and the cohort approach. ¹⁰ RS was estimated using the period approach. The RS estimates for the years between 1970 and 2012 were only presented graphically.
