

Supplementary Materials: Systemic Mobilization of Breast Cancer Resistance Protein in Response to Oncogenic Stress

Małgorzata Szczygieł , Marcin Markiewicz, Milena Julia Szafraniec, Agnieszka Hojda, Leszek Fiedor and Krystyna Urbanska

Figure S1. A calibration curve for mRNA quantification. Several dilutions of a synthetic oligonucleotide complementary to the Taq-man probe were used to generate the curve. The resulting C_t values are plotted as a function of the decimal logarithm of the template amounts and a linear trend is fit to the data.
