

Figure S5. Flow cytometry of TRAIL surface receptors. Death receptor 4 (DR4), membrane-bound decoy receptor 1 (DcR1) and decoy receptor 2 (DcR2) were stained in BRCA2 deficient CAPAN1 vs. wild-type BRCA2 expressing BRCA2/CIN treated with 1 μ M olaparib for 6 days. Error bars represent mean \pm SEM from at least three experiments. NS = non-significant, $P \geq 0.05$, MFI=median fluorescence intensity.
