

Supplementary Material

Platelet Count and Survival after Cancer

Vasily Giannakeas, Joanne Kotsopoulos, Jennifer D. Brooks, Matthew C. Cheung, Laura Rosella, Lorraine Lipscombe, Mohammad R. Akbari, Peter C. Austin and Steven A. Narod

Table S1. Description of administrative datasets used.

Datasets	Years used	Description of use
<i>Population and demographics</i>		
Client Agency Program Enrollment (CAPE)	1999–2016	The CAPE dataset indicates an Ontario resident's enrollment to a primary care/ family doctor along with a start and end date of the enrollment. The CAPE dataset was used to determine what individuals in the cohort were rostered to a primary care physician on the index date.
<i>Health services</i>		
Immigration, Refugees and Citizenship Canada Permanent Resident Database (CIC)	1985–2016	The CIC dataset includes immigration application records for individuals in Ontario. The CIC dataset was used to capture immigration status among individuals in the cohort. The landing date was used to further classify an individual as a recent immigrant (≤ 10 years from index date) or past immigrant (>10 years from index date).
Office of the Registrar General – Deaths (ORGD)	2007–2017	The ORGD dataset contains cause of death information for Ontario residents. The ORGD dataset was used to derive cancer-specific or non-specific death for individuals in the cohort that had a death date in the follow-up period. The underlying cause of death variable, along with ICD-9 codes and the index cancer type were used to derive this variable.
Surname-based Ethnicity Group Database (ETHNIC)	1990–2016	The ETHNIC database is a surname-based algorithm which classifies Ontario residents as either General Population, Chinese, or South Asian ¹ .
Registered Persons Database (RPDB)	1991–2017	The RPDB dataset provides basic demographic information on all Ontario residents registered with provincial health coverage. Demographic variables in the RPDB include date of birth, death date, sex, and postal code (updated annually). Start and end dates of provincial health coverage enrollment are also provided. The RPDB dataset was used to get an individual's age (using date of birth) and sex. Neighborhood income quintile and residence location were derived from postal code information. Start and end dates for provincial health coverage (OHIP) and death date were used to determine eligibility.
Discharge Abstract Database (DAD)	2002–2017	The DAD dataset includes patient-level data for acute care hospitalizations. The data includes clinical details for each hospitalization such as clinical diagnosis (ICD-10) and health-related interventions (CCI).

		Data from DAD was used to capture urgent inpatient hospitalization episodes, Charlson comorbidities, and historic documentation of diseases. Data from DAD was also used to identify chemotherapy or radiotherapy that occurs in an inpatient setting.
National Ambulatory Care Reporting System Database (NACRS)	2002–2017	The NACRS dataset includes visits to an emergency department in Ontario. The data includes details on clinical diagnosis (ICD-10) and health-related interventions (CCI).
		Data from NACRS was used to capture unscheduled emergency department visits. The NACRS dataset also contains cancer clinic visits, which were used to identify chemotherapy and radiotherapy use.
Ontario Drug Benefit Claims Database (ODB)	2005–2016	The ODB dataset includes dispensed medication claims among individuals enrolled in the ODB program in Ontario. All Ontario residents 65 and older are eligible for the ODB program.
		Data from the ODB was used to determine what proportion of individuals are active in the program (i.e. have more than one claim in the year prior), capture low-income seniors, as well as capture concurrent and historic medication use.
Ontario Health Insurance Plan Claims (OHIP)	1997–2017	The OHIP dataset includes physician billings to the province of Ontario among residents with provincial health coverage. Each billing includes a data element on the physician ID, the physician specialty, the patient ID, a diagnostic code (ICD-9), a fee code, and the service date.
		Data from the OHIP dataset was used to obtain variables for primary care visits, specialist visits, cancer screening, cancer treatment, comorbidities, and chronic conditions.
Ontario Laboratories Information System (OLIS)	2007–2017	The OLIS dataset includes laboratory test results among tests being conducted in Ontario.
		The data was used to acquire a dataset of complete blood count (CBC) tests among Ontario residents in the accrual period. These CBC tests were used for exclusions and the exposure definition.
Same Day Surgery (SDS)	2002–2017	The SDS dataset contains patient-level information on same day surgeries, with a similar format to the DAD data.
		Data from the SDS data was used to assign Charlson comorbidities, chemotherapy and radiotherapy.
Registries		
Cancer Activity Level Reporting (ALR)	2005–2017	The ALR dataset includes patient-level activity among cancer patients.
		The dataset was used to determine chemotherapy and radiotherapy treatment among eligible subjects.
New Drug Funding Program (NDFP)	2005–2017	The NDFP data contains dispensation records of new oncologic medications that are typically not funded under standard provincial health coverage.
		The dataset was used to determine chemotherapy and radiotherapy treatment among eligible subjects.
Ontario Breast Screening Program (OBSP)	2005–2016	The OBSP data contains breast screening data among women enrolled in the OBSP program. The data was used to determine if a woman was up to date on her breast cancer screening.

Ontario Cancer Registry (OCR)	1964–2016	The OCR dataset includes all reportable incident cancer diagnosis in Ontario between January 1964 and September 2019 ² . Each incident cancer diagnosis contains information on the cancer site/topology (ICD-10) and cancer morphology (ICD-O-3).
		The OCR data was used to create our inclusion cohort; individuals diagnosed with a cancer in the accrual period. The data was also used to capture cancer-specific variables such as cancer topology, histology and stage.
<i>ICES derived cohorts</i>		
		A population-level cohort of Ontario residents with asthma.
Ontario Asthma Dataset (ASTHMA)	1993–2016	A validated algorithm using DAD and OHIP data ³ : Sensitivity = 80.6% Specificity = 81.4% PPV = 72.5% NVP = 87.3%
		A population-level cohort of Ontario residents with congestive heart failure.
Congestive Heart Failure (CHF)	1991–2016	A validated algorithm using DAD, NACRS and OHIP data ⁴ : Sensitivity = 84.8% Specificity = 97.0% PPV = 55.6%
		A population-level cohort of Ontario residents with chronic obstructive pulmonary disease.
Chronic Obstructive Pulmonary Disease (COPD)	1991–2016	Validated algorithm using DAD and OHIP data ⁵ : Sensitivity = 85.0% Specificity = 78.4%
		A population-level cohort of Ontario residents with dementia.
Ontario Dementia Database (DEMENTIA)	1996–2016	Validated algorithm using DAD, SDS, ODB and OHIP data ⁶ : Sensitivity = 79.3% Specificity = 99.1%
		A population-level cohort of Ontario residents with HIV.
Ontario HIV Database (HIV)	1991–2016	Validated algorithm using OHIP data ⁷ : Sensitivity = 96.2% Specificity = 99.6%
		A population-level cohort of Ontario residents with hypertension.
Ontario Hypertension dataset (HYPER)	1991–2016	Validated algorithm using DAD and OHIP data ⁸ : Sensitivity = 72% Specificity = 95% PPV = 87% NVP = 88%
		The MOMBABY dataset includes infant deliveries in an inpatient setting beginning in 1988. The MOMBABY dataset was used to capture the number of previous infant deliveries and/or any recent infant deliveries (in the 2 years prior) among female individuals.
Ontario Mother-Baby Linked Dataset (MOMBABY)	1988–2016	
Ontario Crohn's and Colitis Cohort Dataset (OCCC)	1991–2016	A population-level cohort of Ontario residents with Crohn's and Colitis. Validated algorithm using DAD, NACRS and OHIP data ⁹ : Sensitivity = 59.3%

			Specificity = 99.0% PPV = 71.1% NPV = 98.3%
A population-level cohort of Ontario residents with diabetes.			
Ontario Diabetes Dataset (ODD)	1991–2016	Validated algorithm using DAD and ODB data ¹⁰ : Sensitivity = 90.0% Specificity = 97.7% PPV = 92.6%	
A population-level cohort of Ontario residents with rheumatoid arthritis.			
Ontario Rheumatoid Arthritis Dataset (ORAD)	1993–2016	Validated algorithm using DAD and OHIP data ¹¹ : Sensitivity = 78% Specificity = 100% PPV = 78% NPV = 100%	
<i>Other datasets</i>			
Drug List Dataset (DIN)	1990–2020	The DIN dataset includes drug information unique by the drug DIN. Drug data includes drug name, drug class, strength, and route administered. Unique drug name was used to determine the concurrent number of drugs being used. Drug class was used to identify historic use of drugs that affect platelet function.	

ICD = International Classification of Disease; CCI = Canadian Classification of Health Interventions;
PPV = Positive Predictive Value; NPV = Negative Predictive Value; ODB = Ontario Drug Benefits Database.

Table S2. Definitions of site-specific cancer events.

Definition	Sub-definition	Data source(s)	Code type	Codes	Conditions/Notes
<i>Incident cancer diagnosis</i>	Any malignant neoplasm	OCR	ICD-10	C00-C97	
	Any primary solid tumour	OCR	ICD-10	C00-C97	
	Colon	OCR	ICD-10	C18 – Colon C19 – Rectosigmoid junction C20 – Rectum	
	Lung	OCR	ICD-10	C34 – Bronchus or lung	
	Breast	OCR	ICD-10	C50 – Breast	Female sex
	Ovary	OCR	ICD-10	C56 – Ovary C570 – Fallopian tube	Female sex
	Cervical	OCR	ICD-10	C53 – Cervix	Female sex
	Endometrium	OCR	ICD-10	C54 – Corpus uteri	Female sex
	Prostate	OCR	ICD-10	C61 – Prostate	Male sex
	Testicle	OCR	ICD-10	C62 – Testis	Male sex
	Thyroid	OCR	ICD-10	C73 – Thyroid gland	
	Pancreas	OCR	ICD-10	C25 – Pancreas	
	Stomach	OCR	ICD-10	C16 – Stomach	
<i>Malignant solid tumour **</i>	Kidney	OCR	ICD-10	C64 – Kidney C65 – Renal Pelvis	
	Bladder	OCR	ICD-10	C67 – Bladder	
	Liver	OCR	ICD-10	C22 – Liver and intrahepatic bile ducts	
	Esophagus	OCR	ICD-10	C15 – Esophagus	
	Other gastrointestinal tract	OCR	ICD-10	C17 – Small intestine C21 – Anus and anal canal C23 – Gallbladder	
	Brain	OCR	ICD-10	C71 – Brain	
	Melanoma	OCR	ICD-10	C00-C97, and one of 8720/3 – Malignant Melanoma, NOS 8743/3 – Superficial Spreading Melanoma 8721/3 – Nodular Melanoma 8742/3 – Lentigo Maligna Melanoma 8744/3 – Acral Lentiginous Melanoma 8772/3 – Spindle Cell Melanoma, NOS	Note: All ICD-O-3 melanoma codes were derived from the cancer registry and are in order from most frequent to least frequent among melanoma pathologies.
			ICD-O-3		

				8745/3 – Desmoplastic Melanoma 8770/3 – Mixed Epithelioid and Spindle Cell Melanoma 8771/3 – Epithelioid Cell Melanoma 8730/3 – Amelanotic Melanoma 8723/3 – Malignant Melanoma, Regressing 8774/3 – Spindle Cell Melanoma, Type B 8761/3 – Malignant Melanoma in a Giant Pigmented Nevus 8740/3 – Malignant Melanoma in Junctional Nevus 8722/3 – Balloon Cell Melanoma 8773/3 – Spindle Cell Melanoma, type A 8746/3 – Mucosal Lentiginous Melanoma 8741/3 – Malignant Melanoma in Precancerous Melanosis
Head and neck	OCR	ICD-10		C00-C09 – Lip, oral cavity C10 – Oropharynx C11 – Nasopharynx C13 – Hypopharynx C12 – Piriform sinus C14 – Lip, oral cavity and pharynx (ill-defined) C30 – Nasal cavity and middle ear C31 – Accessory sinuses C32 – Larynx
Other solid tumour	OCR	ICD-10	C00-C97	Cancer event met solid tumour definition, but none of the site-specific definitions described above.

** Solid tumours are morphologic codes that are not in hematological, lymphoid and related tissue definitions.

Table S3. Definitions of descriptive and treatment variables.

Variable Class	Definition	Data source(s)	Code type	Codes	Conditions/Notes
<i>Health services utilization</i>	Core primary care visit	OHIP	Fee code	A001 - MINOR ASSESS.-F.P./G.P. A002 - Family Practice & Practice in General - Enhanced 18 month well baby visit A003 - GEN. Chronic coronary disease	OHIP	ICD-9	411, 412, 413, 414
	DAD/SDS	ICD-10	I20, I22, I23, I24, I25
Acute myocardial infarction	DAD/SDS	ICD-10	I21

* All chronic conditions were obtained from validated diagnostic codes¹². Definitions were defined based on either: 1) minimum of 3 OHIP claims, each claim greater than 30 days apart and less than 2 years apart, or 2) minimum of one inpatient hospitalization with any of the diagnostic codes.

Table S4. Definitions of cancer-specific death.

Definition	Data source(s)	Code type	Codes
Colon	ORGD	ICD-9	153 – Malignant neoplasm of colon 154 – Malignant neoplasm of rectum rectosigmoid junction and anus 159 – Malignant neoplasm of other and ill-defined sites within the digestive organs and peritoneum 197 – Secondary malignant neoplasm of respiratory and digestive systems 198 – Secondary malignant neoplasm of other specified sites <u>199 – Malignant neoplasm without specification of site</u>
Lung	ORGD	ICD-9	162 – Malignant neoplasm of trachea bronchus and lung 197 – Secondary malignant neoplasm of respiratory and digestive systems 198 – Secondary malignant neoplasm of other specified sites <u>199 – Malignant neoplasm without specification of site</u>
Breast	ORGD	ICD-9	174 – Malignant neoplasm of female breast 197 – Secondary malignant neoplasm of respiratory and digestive systems 198 – Secondary malignant neoplasm of other specified sites <u>199 – Malignant neoplasm without specification of site</u>
Ovary	ORGD	ICD-9	183 – Malignant neoplasm of ovary and other uterine adnexa 184 – Malignant neoplasm of other and unspecified female genital organs 158 – Malignant neoplasm of retroperitoneum and peritoneum 159 – Malignant neoplasm of other and ill-defined sites within the digestive organs and peritoneum 197 – Secondary malignant neoplasm of respiratory and digestive systems 198 – Secondary malignant neoplasm of other specified sites <u>199 – Malignant neoplasm without specification of site</u>
Cervical	ORGD	ICD-9	180 – Malignant neoplasm of cervix uteri 179 – Malignant neoplasm of uterus, part unspecified 184 – Malignant neoplasm of other and unspecified female genital organs 197 – Secondary malignant neoplasm of respiratory and digestive systems 198 – Secondary malignant neoplasm of other specified sites <u>199 – Malignant neoplasm without specification of site</u>
Endometrium	ORGD	ICD-9	182 – Malignant neoplasm of body of uterus

			179 – Malignant neoplasm of uterus, part unspecified
			197 – Secondary malignant neoplasm of respiratory and digestive systems
			198 – Secondary malignant neoplasm of other specified sites
			199 – Malignant neoplasm without specification of site
			185 – Malignant neoplasm of prostate
Prostate	ORGD	ICD-9	197 – Secondary malignant neoplasm of respiratory and digestive systems
			198 – Secondary malignant neoplasm of other specified sites
			199 – Malignant neoplasm without specification of site
			186 – Malignant neoplasm of testis
Testicle	ORGD	ICD-9	197 – Secondary malignant neoplasm of respiratory and digestive systems
			198 – Secondary malignant neoplasm of other specified sites
			199 – Malignant neoplasm without specification of site
			193 – Malignant neoplasm of thyroid gland
Thyroid	ORGD	ICD-9	197 – Secondary malignant neoplasm of respiratory and digestive systems
			198 – Secondary malignant neoplasm of other specified sites
			199 – Malignant neoplasm without specification of site
			157 – Malignant neoplasm of pancreas
Pancreas	ORGD	ICD-9	159 – Malignant neoplasm of other and ill-defined sites within the digestive organs and peritoneum
			197 – Secondary malignant neoplasm of respiratory and digestive systems
			198 – Secondary malignant neoplasm of other specified sites
			199 – Malignant neoplasm without specification of site
			151 – Malignant neoplasm of stomach
			150 – Malignant neoplasm of esophagus
			152 – Malignant neoplasm of small intestine including duodenum
Stomach	ORGD	ICD-9	159 – Malignant neoplasm of other and ill-defined sites within the digestive organs and peritoneum
			197 – Secondary malignant neoplasm of respiratory and digestive systems
			198 – Secondary malignant neoplasm of other specified sites
			199 – Malignant neoplasm without specification of site
			189 – Malignant neoplasm of kidney and other and unspecified urinary organs
Kidney	ORGD	ICD-9	197 – Secondary malignant neoplasm of respiratory and digestive systems
			198 – Secondary malignant neoplasm of other specified sites
			199 – Malignant neoplasm without specification of site
			188 – Malignant neoplasm of bladder
Bladder	ORGD	ICD-9	189 – Malignant neoplasm of kidney and other and unspecified urinary organs
			197 – Secondary malignant neoplasm of respiratory and digestive systems
			198 – Secondary malignant neoplasm of other specified sites
			199 – Malignant neoplasm without specification of site
			150 – Malignant neoplasm of esophagus
			151 – Malignant neoplasm of stomach
Esophagus	ORGD	ICD-9	197 – Secondary malignant neoplasm of respiratory and digestive systems
			198 – Secondary malignant neoplasm of other specified sites
			199 – Malignant neoplasm without specification of site

Other gastrointestinal tract	ORGD	ICD-9	150 – Malignant neoplasm of esophagus 151 – Malignant neoplasm of stomach 152 – Malignant neoplasm of small intestine including duodenum 153 – Malignant neoplasm of colon 154 – Malignant neoplasm of rectum rectosigmoid junction and anus 156 – Malignant neoplasm of gallbladder and extrahepatic bile ducts 157 – Malignant neoplasm of pancreas 158 – Malignant neoplasm of retroperitoneum and peritoneum 159 – Malignant neoplasm of other and ill-defined sites within the digestive organs and peritoneum 197 – Secondary malignant neoplasm of respiratory and digestive systems 198 – Secondary malignant neoplasm of other specified sites 199 – Malignant neoplasm without specification of site
Brain	ORGD	ICD-9	191 – Malignant neoplasm of brain 197 – Secondary malignant neoplasm of respiratory and digestive systems 237 – Neoplasm of uncertain behavior of endocrine glands and nervous system 198 – Secondary malignant neoplasm of other specified sites 199 – Malignant neoplasm without specification of site
Melanoma	ORGD	ICD-9	172 – Malignant melanoma of skin 173 – Oth and unspec malignant neoplasm of skin 197 – Secondary malignant neoplasm of respiratory and digestive systems 198 – Secondary malignant neoplasm of other specified sites 199 – Malignant neoplasm without specification of site
Head and neck	ORGD	ICD-9	14 – Malignant Neoplasm of Lip, Oral Cavity, and Pharynx 176 – Kaposi's sarcoma 197 – Secondary malignant neoplasm of respiratory and digestive systems 198 – Secondary malignant neoplasm of other specified sites 199 – Malignant neoplasm without specification of site
Other solid tumour	ORGD	ICD-9	14 – Malignant Neoplasm of Lip, Oral Cavity, and Pharynx 150 – Malignant neoplasm of esophagus 151 – Malignant neoplasm of stomach 152 – Malignant neoplasm of small intestine including duodenum 153 – Malignant neoplasm of colon 154 – Malignant neoplasm of rectum rectosigmoid junction and anus 156 – Malignant neoplasm of gallbladder and extrahepatic bile ducts 157 – Malignant neoplasm of pancreas 158 – Malignant neoplasm of retroperitoneum and peritoneum 159 – Malignant neoplasm of other and ill-defined sites within the digestive organs and peritoneum 16 – Malignant Neoplasm of Respiratory and Intrathoracic Organs 17 – Malignant Neoplasm of Bone, Connective Tissue, Skin, and Breast 18 – Malignant Neoplasm of Genitourinary Organs 19 – Malignant Neoplasm of Other and Unspecified Sites

Table S5. Inclusion table for cancer subjects.

	Frequency	Percent
<i>Total incident cancers diagnosis in accrual period</i>	673,834	
Exclusion		
1. Missing topology information	7	0.00
2. Incident liver cancer	9,756	1.45
3. Incident hematological cancer	81,379	12.08
4. No baseline platelet value	449,104	66.65
Eligible cancer diagnosis for inclusion cohort	133,588	19.83

Table S6. Exclusion table for study cohort.

	Frequency	Percent
<i>Total incident cancers meeting inclusion criteria</i>	133,588	
Exclusion		
1. Missing date of birth	≤ 5	0
2. Missing sex	≤ 5	0
3. Age <18 on index date	441	0.33
4. Age >100 on index date	73	0.05
5. Death date prior to/on index date	1,918	1.44
6. OHIP ineligible on index date	126	0.09
7. History of cancer in the OCR prior to index date	12,390	9.27
8. History of cancer therapy (chemotherapy or radiotherapy) in the two years prior to index date	5,014	3.75
9. Multiple primary cancers on index date	1,394	1.04
Eligible cancer subjects	112,231	84.01

Table S7. Descriptive table of cancer patients (meeting all exclusion criteria) with versus without a baseline platelet count.

HR = Hazard ratio; pctl = percentile; NA = Not applicable; *SS* = data suppressed due to small number of observations/events. * Adjusted for age at diagnosis (cat.), year of diagnosis (cont.), and common chronic conditions (asthma, congestive heart failure, chronic obstructive pulmonary disease, hypertension, and diabetes). ** Adjusted for age at diagnosis (cat.), year of diagnosis (cont.), common chronic conditions (asthma, congestive heart failure, chronic obstructive pulmonary disease, hypertension, and diabetes), and cancer stage. Only subjects with known cancer stage were included in the analysis. *** Adjusted for age at diagnosis (cat.), year of diagnosis (cont.), common chronic conditions (asthma, congestive heart failure, chronic obstructive pulmonary disease, hypertension, and diabetes), cancer stage, chemotherapy, and radiotherapy. Only subjects with known cancer stage were included in the analysis. Time-dependent confounding adjustment using marginal structural models.

Table S16. Cancer-specific mortality rates and hazard ratios by time-dependent platelet count category (exposure definition 2).

Cancer	Platelet category	Unadjusted		Patient variable adjustment*		Patient variable and cancer stage adjustment**		Patient variable, cancer stage, and cancer treatment adjustment***

HR = Hazard ratio; pctl = percentile; NA = Not applicable; *SS* = data suppressed due to small number of observations/events. * Adjusted for age at diagnosis (cat.), year of diagnosis (cont.), and common chronic conditions (asthma, congestive heart failure, chronic obstructive pulmonary disease, hypertension, and diabetes). ** Adjusted for age at diagnosis (cat.), year of diagnosis (cont.), common chronic conditions (asthma, congestive heart failure, chronic obstructive pulmonary disease, hypertension, and diabetes), and cancer stage. Only subjects with known cancer stage were included in the analysis. *** Adjusted for age at diagnosis (cat.), year of diagnosis (cont.), common chronic conditions (asthma, congestive heart failure, chronic obstructive pulmonary disease, hypertension, and diabetes), cancer stage, chemotherapy, and radiotherapy. Only subjects with known cancer stage were included in the analysis. Time-dependent confounding adjustment using marginal structural models.

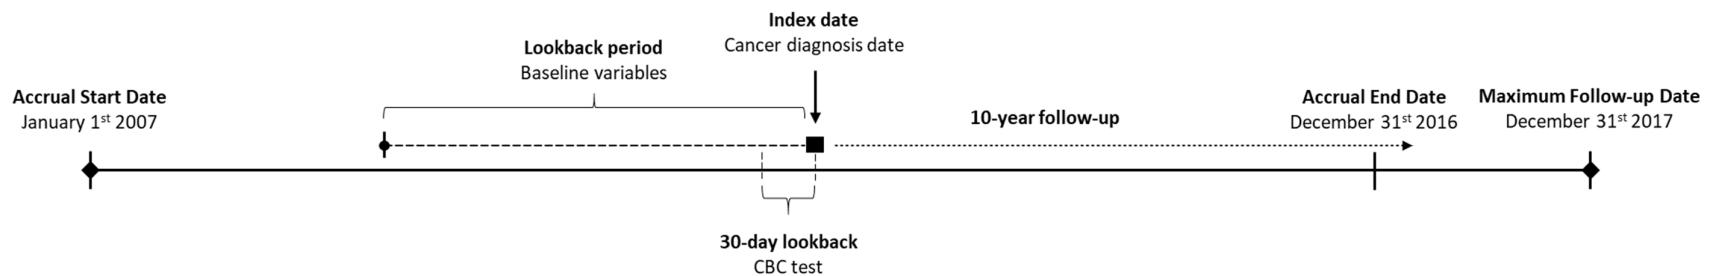

Figure S1. Study design and inclusion criteria among cancer patients.

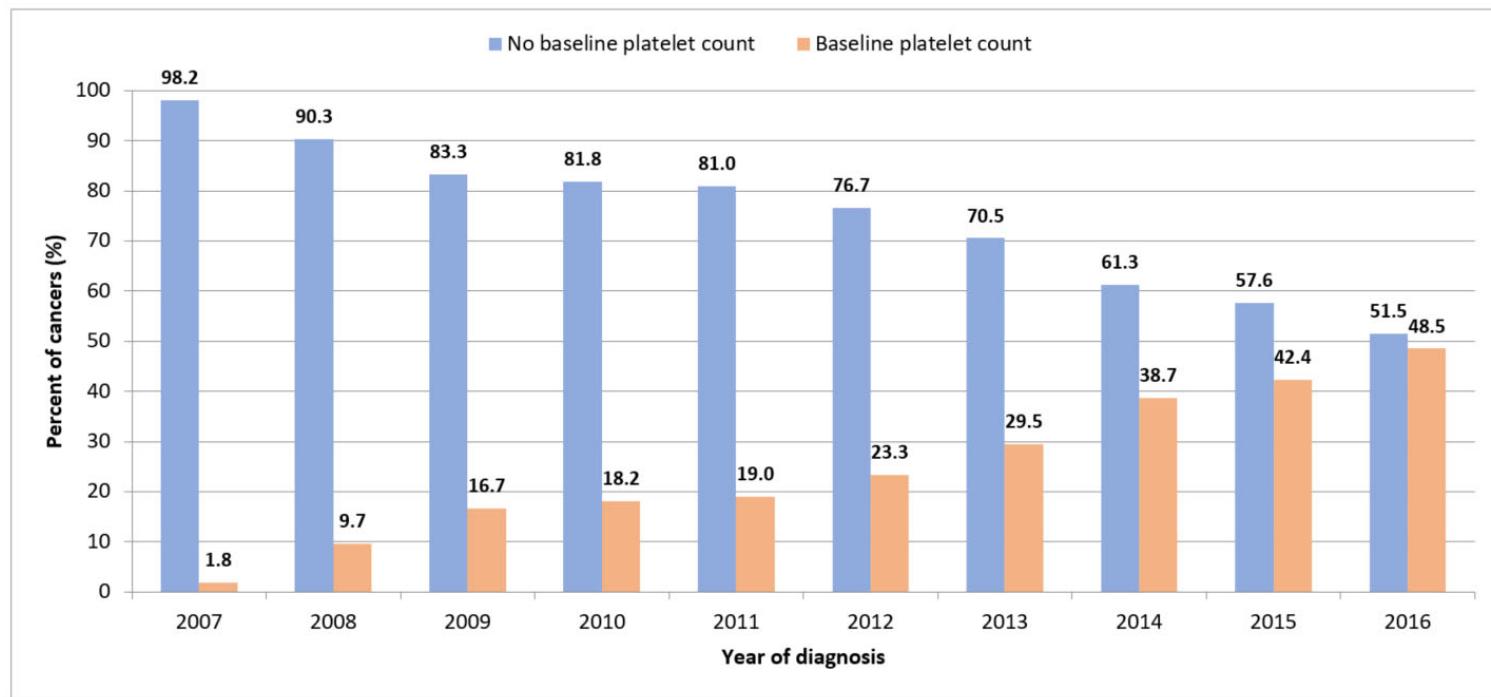

Figure S2. Proportion of cancer patients with a baseline platelet count (within 30 days of cancer diagnosis), by calendar year.

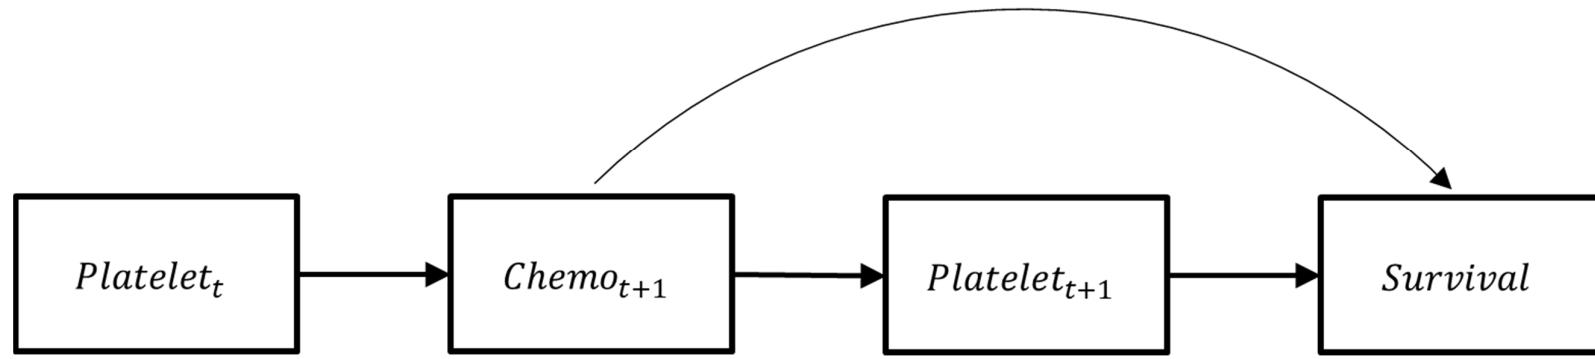

Figure S3. Schematic of time-dependent confounding that could occur between platelet count and cancer treatment.

- (1) Platelet count at time t may influence treatment decision for chemotherapy at time $t+1$.
- (2) Chemotherapy at $t+1$ is causally associated with a higher cancer-specific survival.
- (3) Chemotherapy at time $t+1$ influences platelet count at time $t+1$.
- (4) Platelet count at time $t+1$ may be associated with survival.

Exposure weight models:

Numerator model

$$\text{logit} \left(P(Y_i = y | \beta_0 + \sum \beta_j x_j) \right) = \beta_0 + \sum \beta_j x_j$$

Outcome: platelet count category (at time t)

Predictors: prior platelet count category (t-1), age at diagnosis, year of diagnosis, asthma, CHF, COPD, hypertension, diabetes, and cancer stage.

Denominator model

$$\text{logit} \left(P(Y_i = y | \beta_0 + \sum \beta_j x_j) \right) = \beta_0 + \sum \beta_j x_j$$

Outcome: platelet count category (at time t)

Predictors: prior platelet count category (t-1), chemotherapy use (at time t), radiotherapy use (at time t), age at diagnosis, year of diagnosis, asthma, CHF, COPD, hypertension, diabetes, and cancer stage.

Censor weight models:

Numerator model

$$\text{logit} \left(P(Y = 1 | \beta_0 + \sum \beta_j x_j) \right) = \beta_0 + \sum \beta_j x_j$$

Outcome: Censoring event

Predictors: prior platelet count category (t-1), age at diagnosis, year of diagnosis, asthma, CHF, COPD, hypertension, diabetes, and cancer stage.

Denominator model

$$\text{logit} \left(P(Y = 1 | \beta_0 + \sum \beta_j x_j) \right) = \beta_0 + \sum \beta_j x_j$$

Outcome: Censoring event

Predictors: prior platelet count category (t-1), chemotherapy use (at time t), radiotherapy use (at time t), age at diagnosis, year of diagnosis, asthma, CHF, COPD, hypertension, diabetes, and cancer stage.

Standardized weights calculations:

$$SW_t = \frac{\prod_{i=1}^t P_{\text{treat}}(Y_i = y)_{\text{num}} / P_{\text{treat}}(Y_i = y)_{\text{denom}}}{\prod_{i=1}^t [(Y_{\text{cens}} = 1) \times P_{\text{cens}}(Y = 1)_{\text{num}} + (Y_{\text{cens}} = 0) \times (1 - P_{\text{cens}}(Y = 1)_{\text{num}}) / ((Y_{\text{cens}} = 1) \times P_{\text{cens}}(Y = 1)_{\text{denom}} + (Y_{\text{cens}} = 0) \times (1 - P_{\text{cens}}(Y = 1)_{\text{denom}}))]}$$

$P_{\text{treat}}(Y_i = y)_{\text{num}}$ Probability of being in treatment class y at time t in the numerator model

$P_{\text{treat}}(Y_i = y)_{\text{denom}}$ Probability of being in the treatment class y at time t in the denominator model

$P_{\text{cens}}(Y = 1)_{\text{num}}$ Probability of being censored at time t in the numerator model

$P_{\text{cens}}(Y = 1)_{\text{denom}}$ Probability of being censored at time t in the denominator model

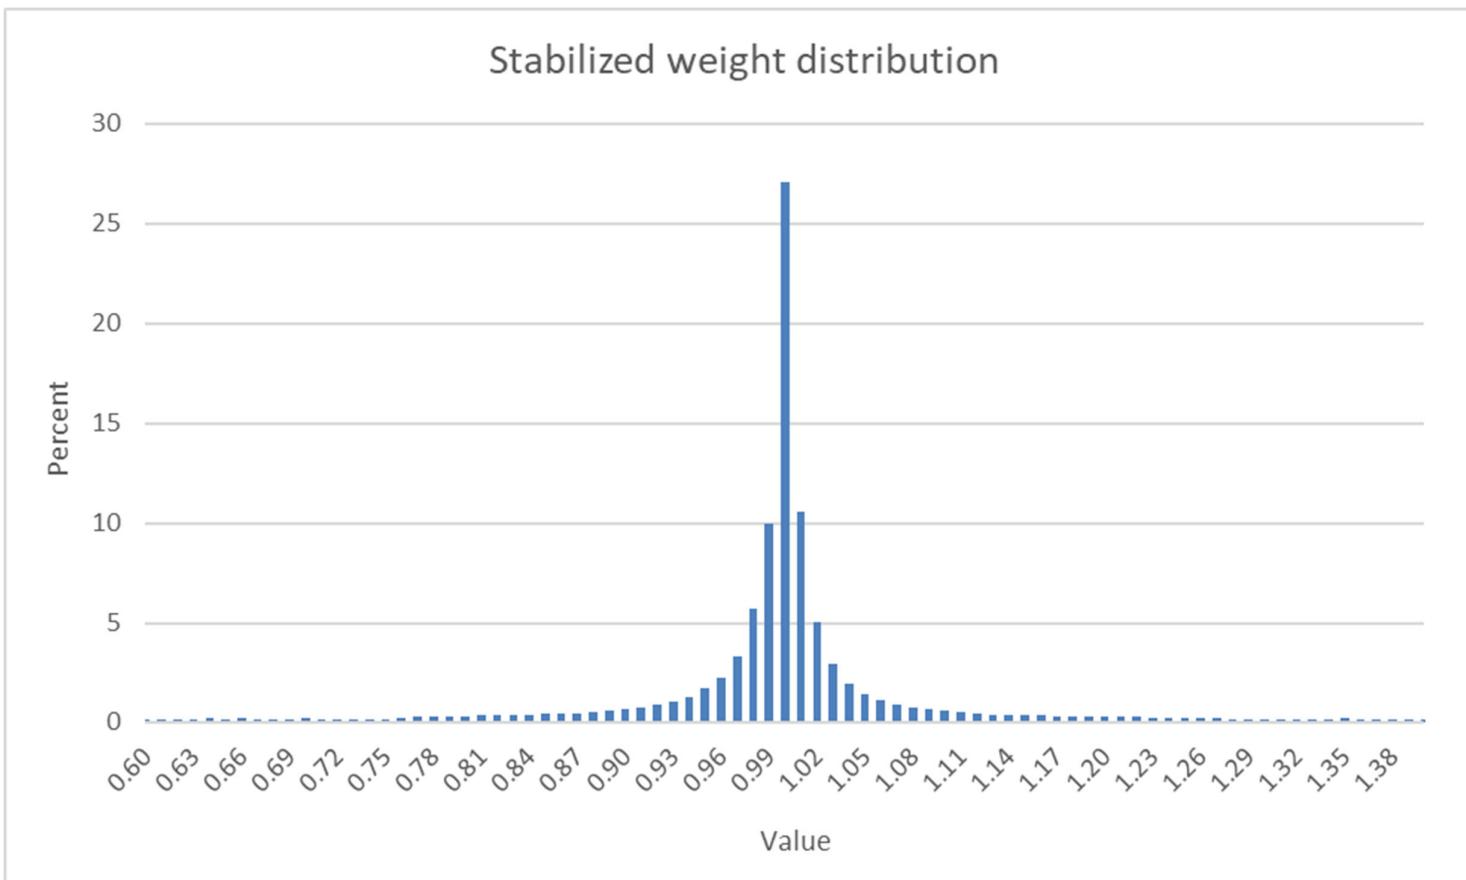

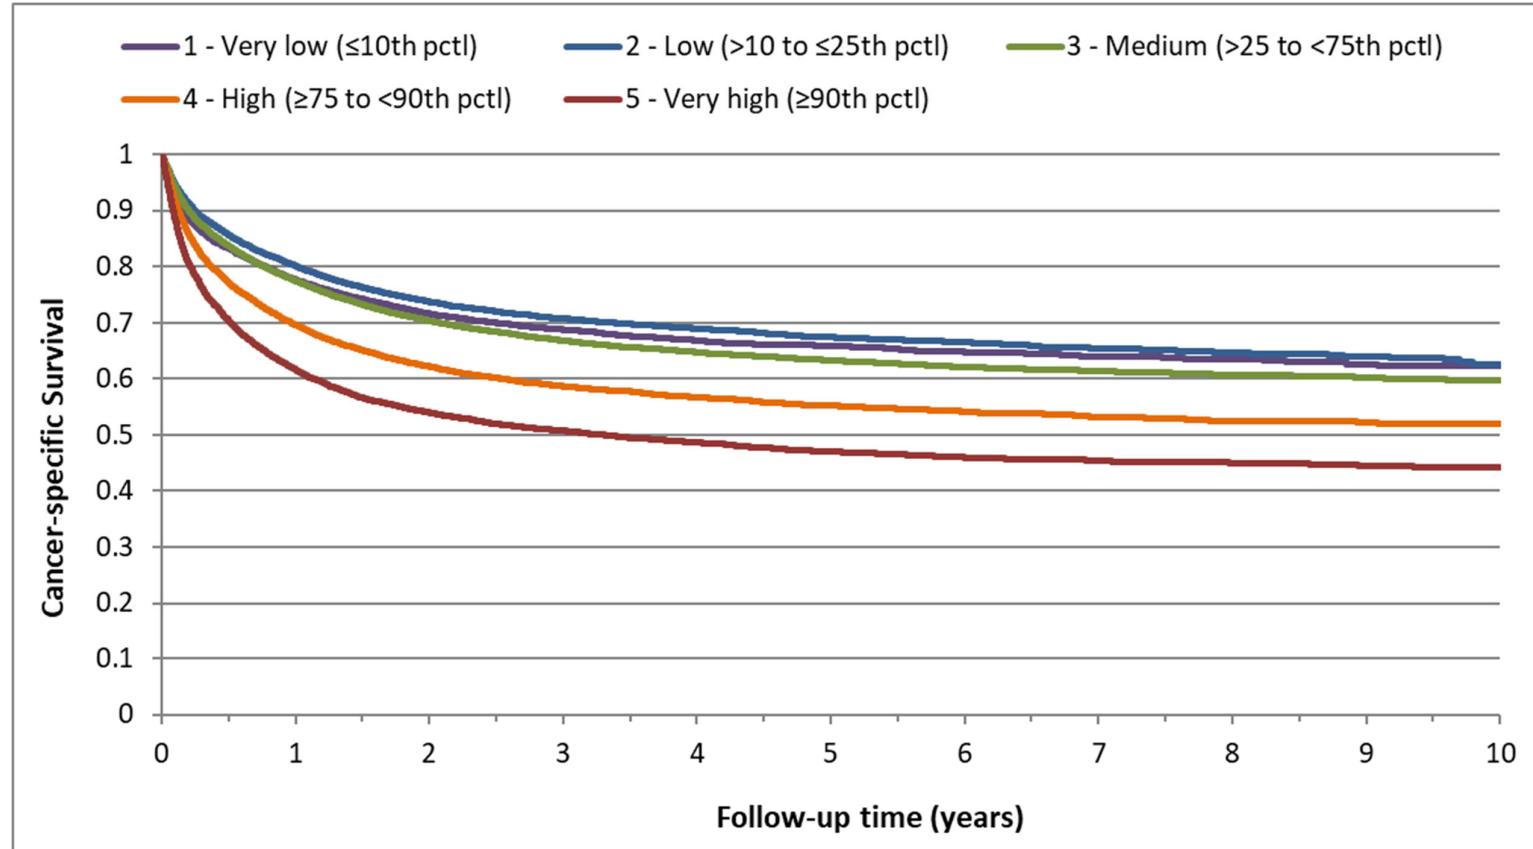

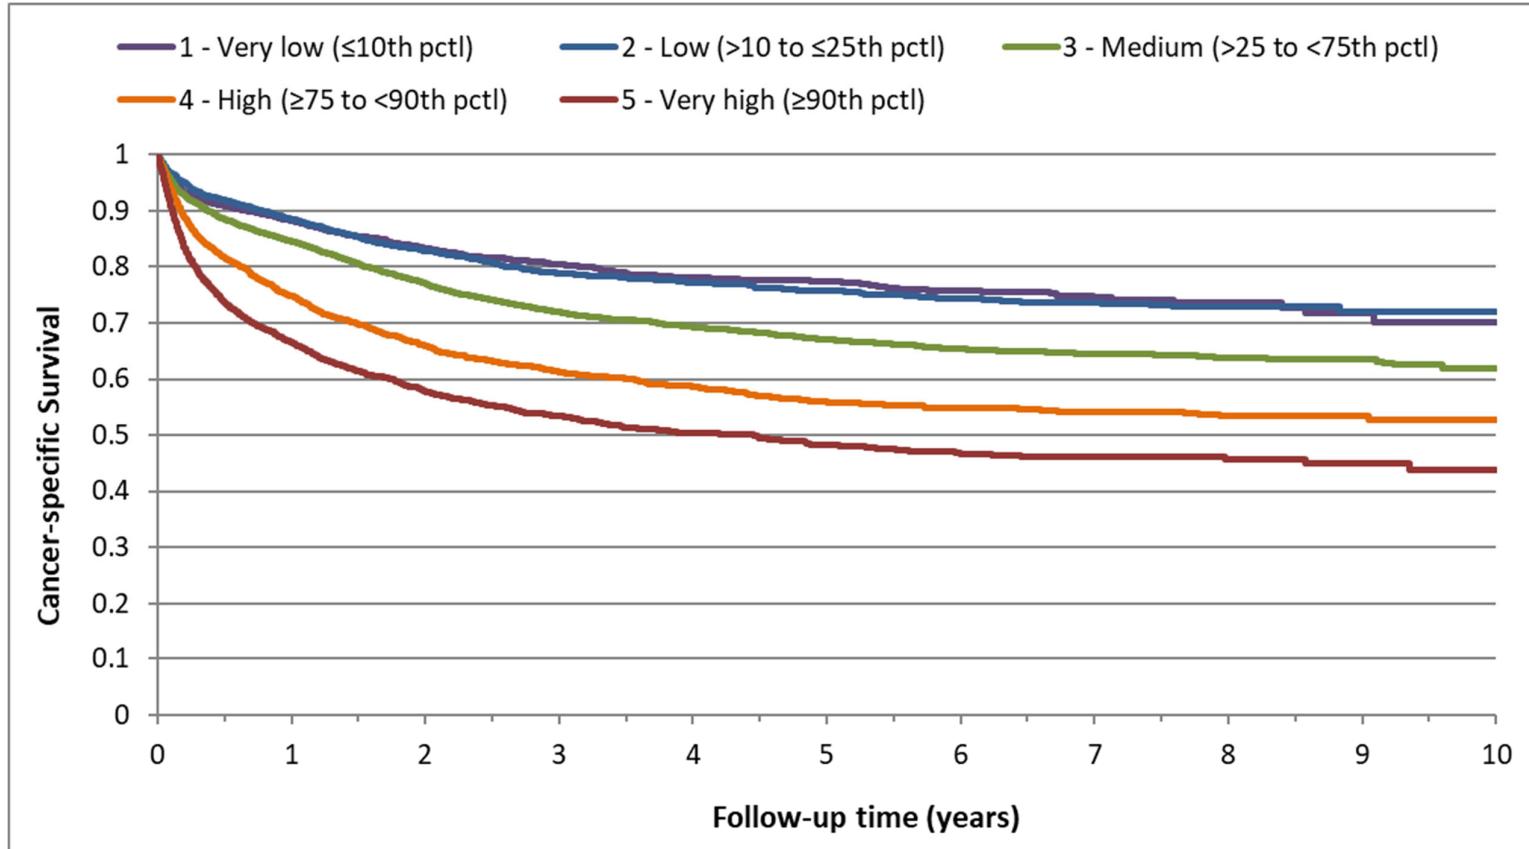

Figure S4. Distribution of stabilized weights among observations included in the marginal structural models (exposure definition 1).

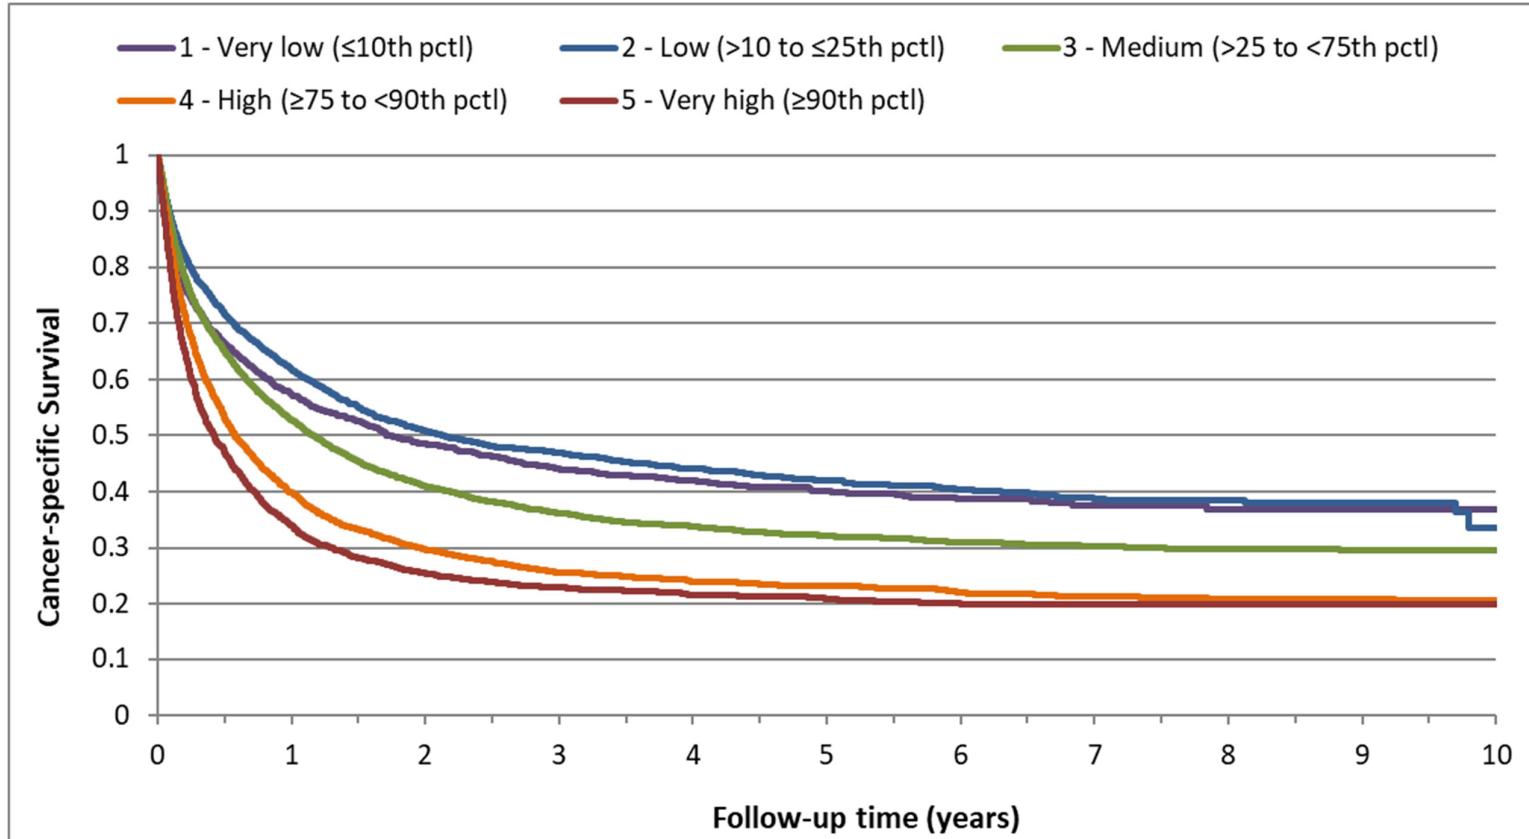

N	10,881,327
Mean	1.0099
Standard Deviation	0.3291
Minimum	0.0614
Maximum	14.1718

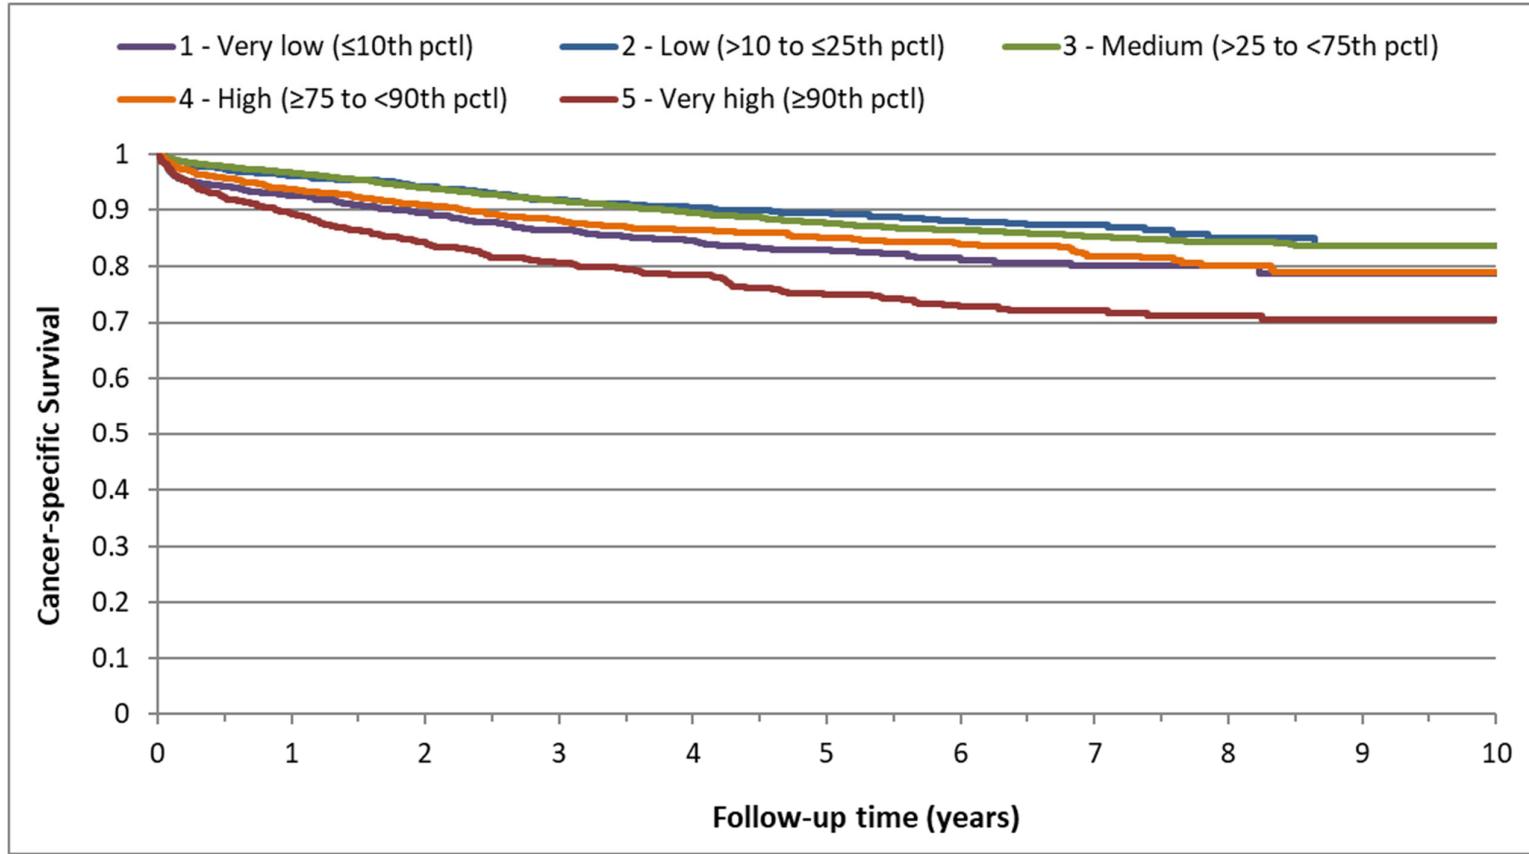

(A) All cancers (n = 112,231)

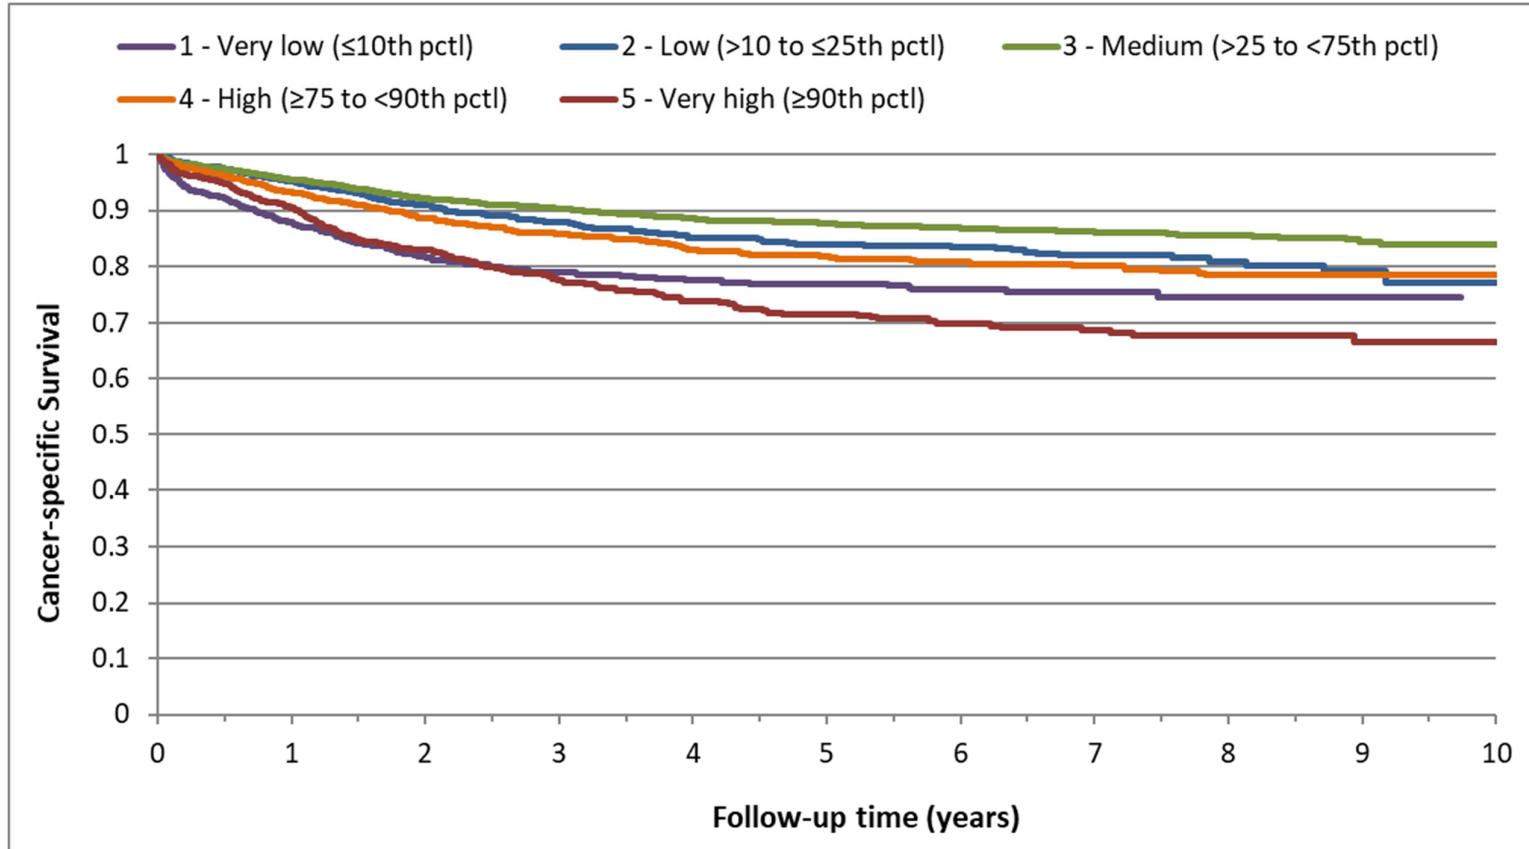

(B) Colon (n = 17,259)

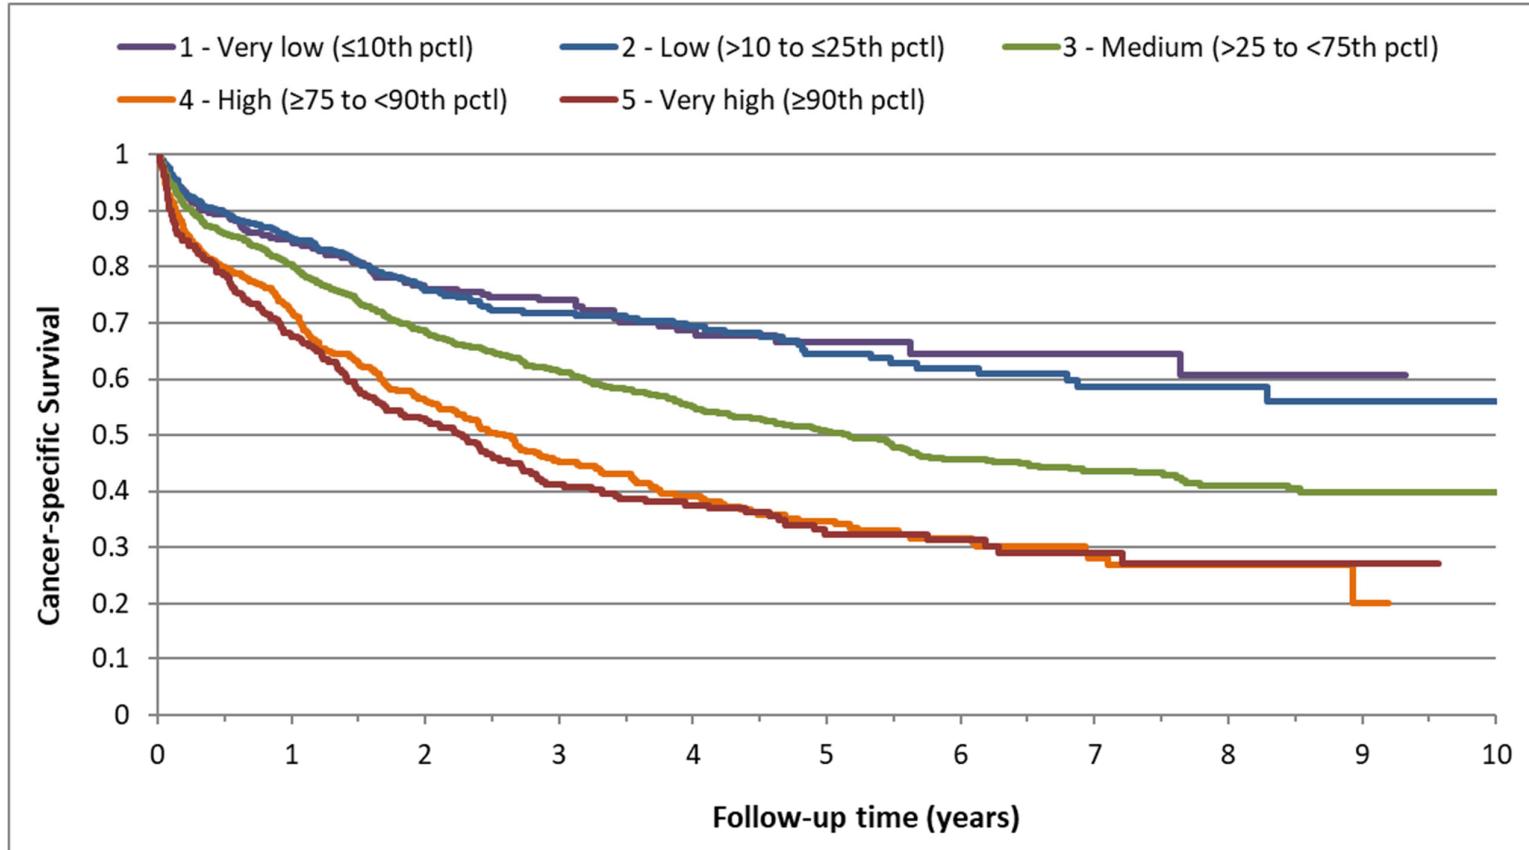

(C) Lung (n = 20,583)

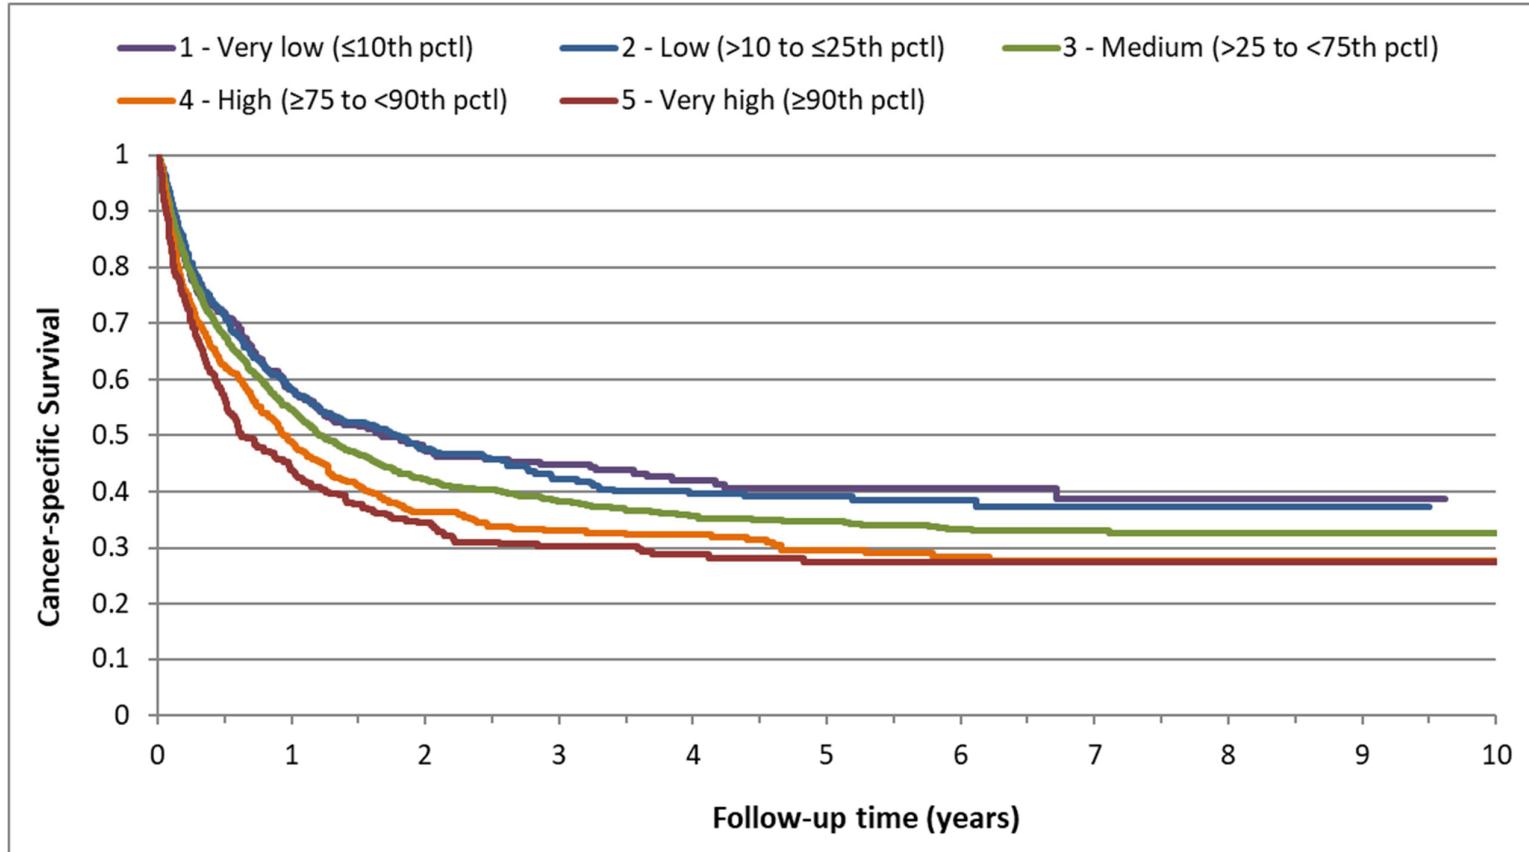

(D) Breast (n = 9,857)

(E) Prostate (n = 8,587)

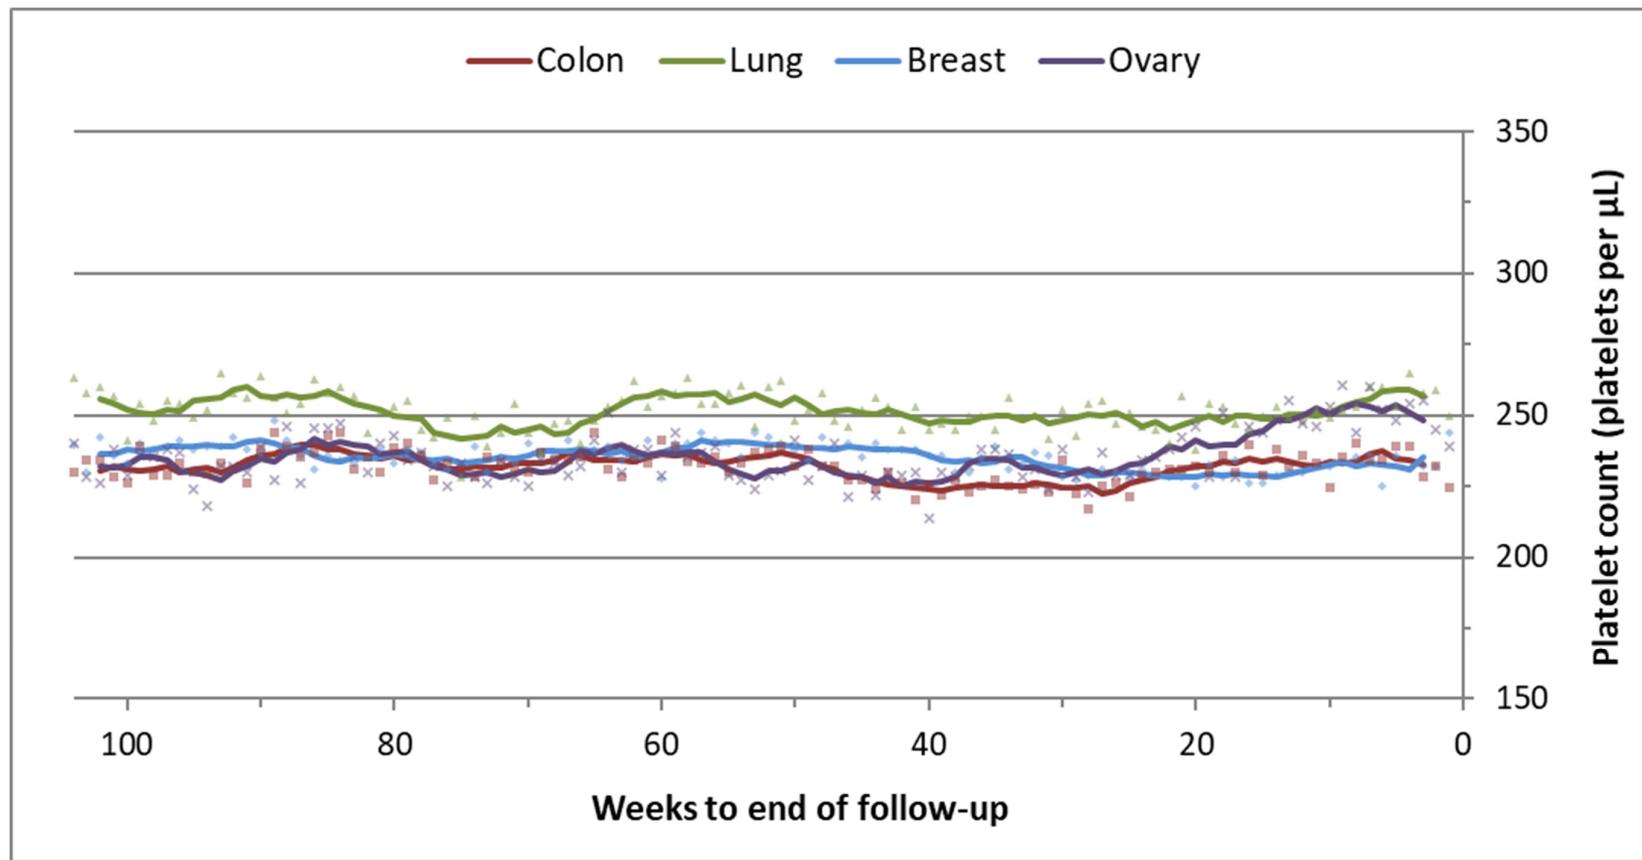

(F) Ovary (n = 3,085)

(G) Stomach (n = 3,365)

Figure S5. Cancer-specific survival by baseline platelet count category (exposure definition 2), for select cancers.

(A) Female patients

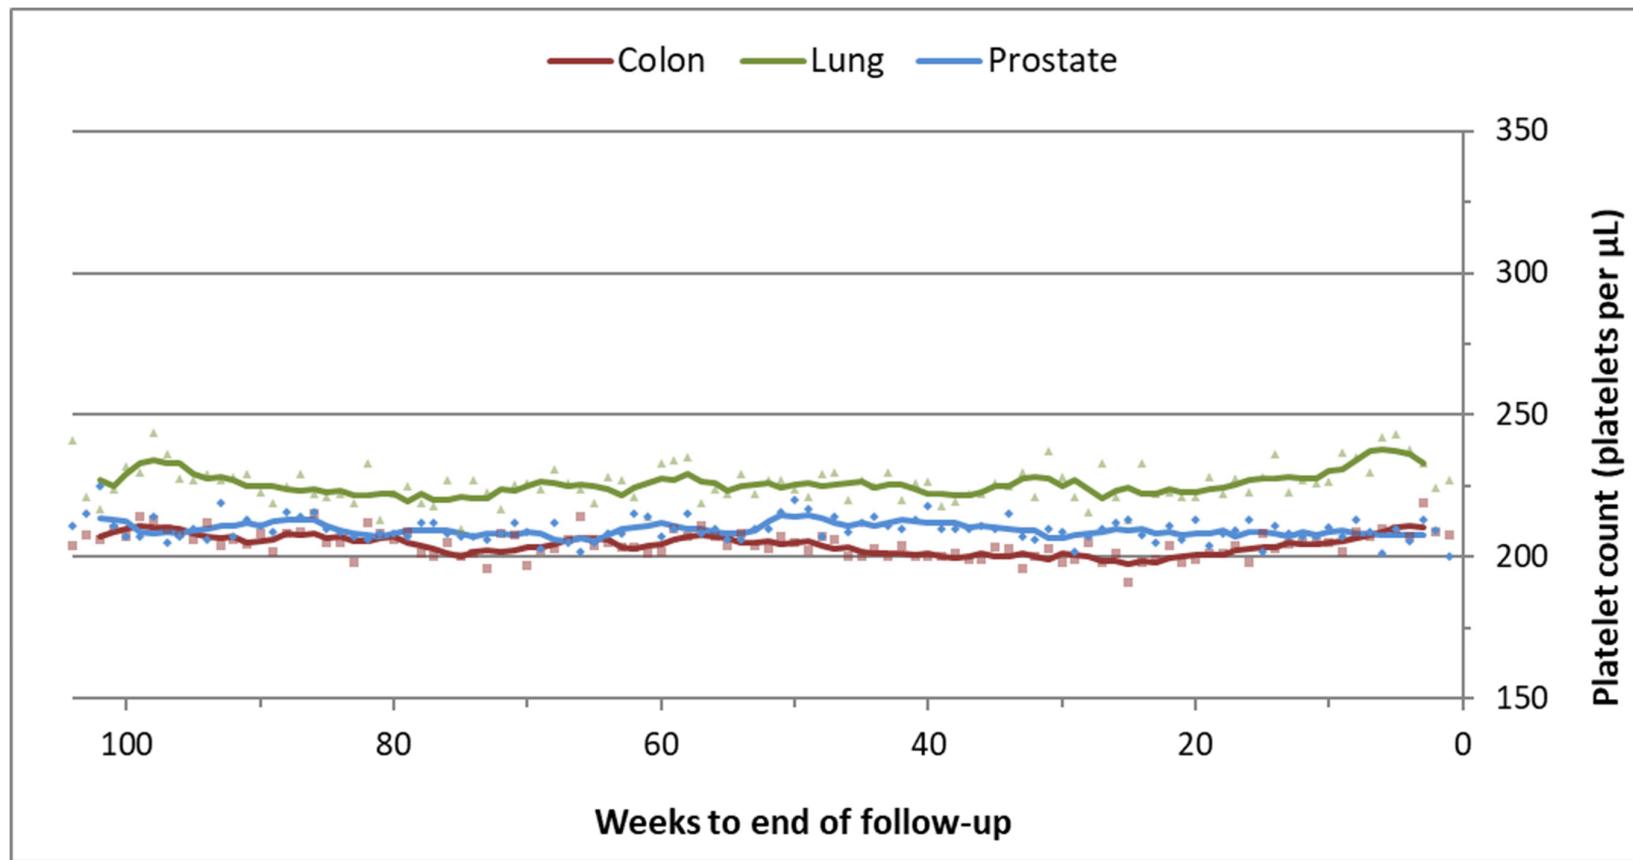

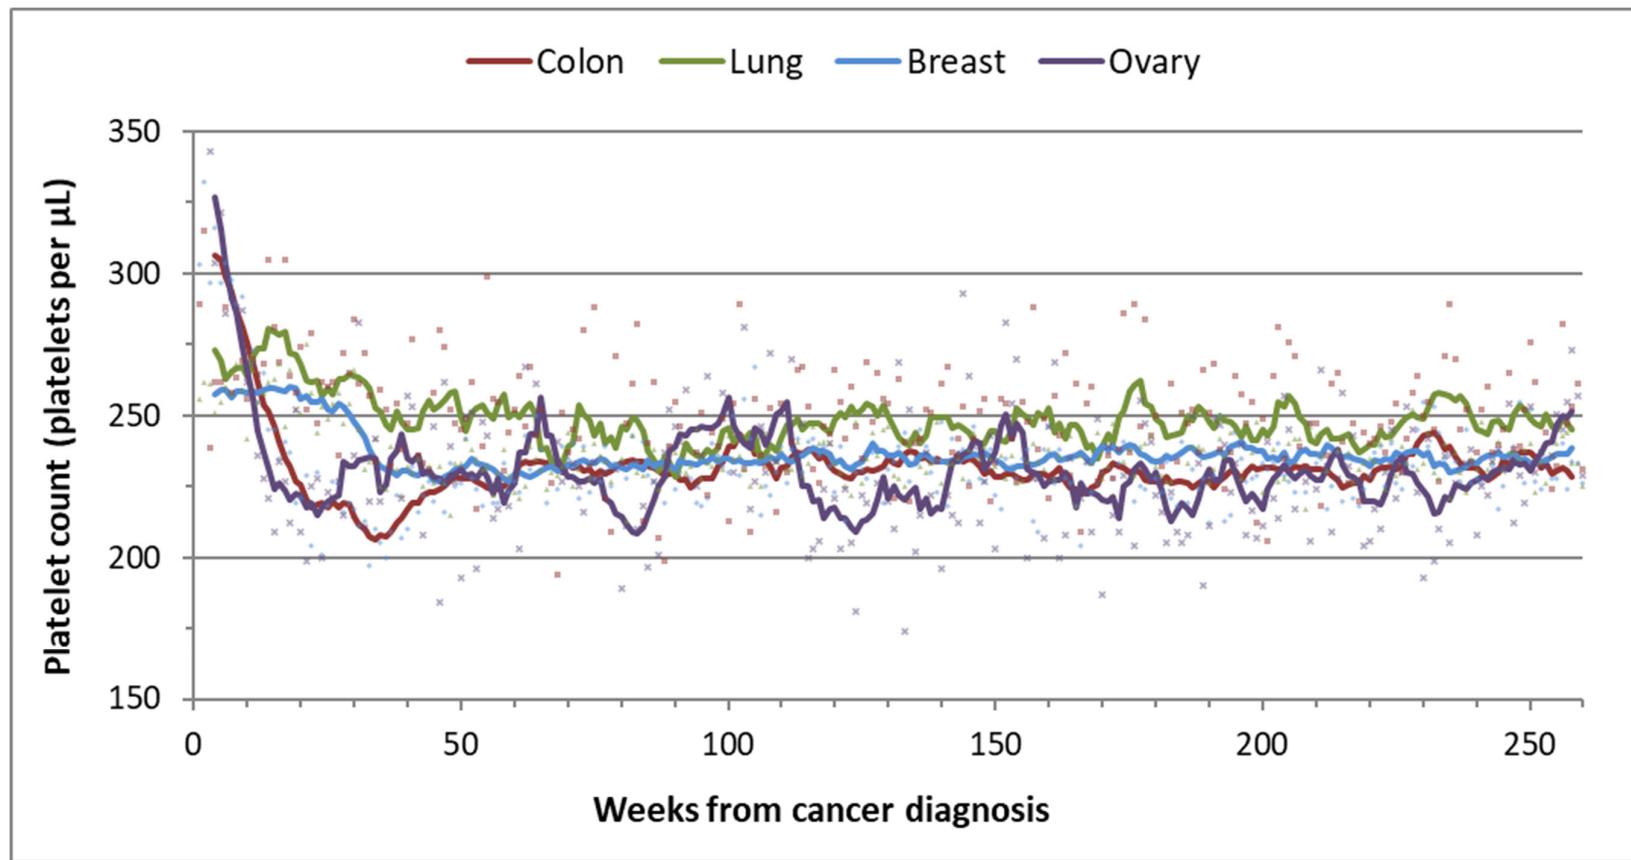

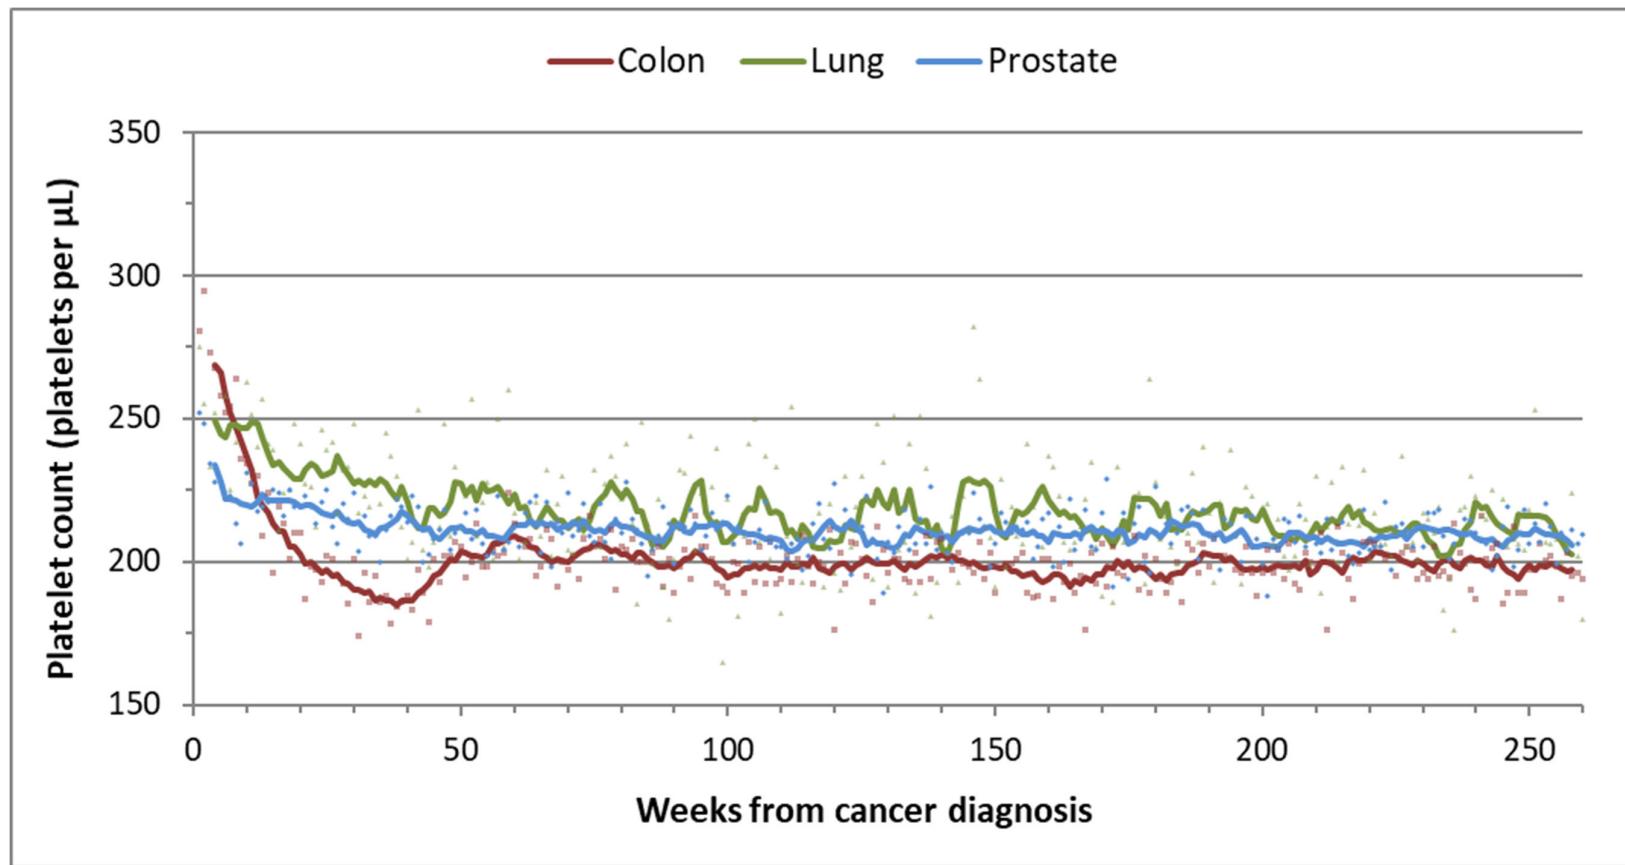

Figure S6. Median platelet count moving average (period of 5) in the 104 weeks (2 years) preceding end of follow-up, among patients that did not die from their index cancer.

(A) Female patients

(B) Male patients

Figure S7. Median platelet count moving average (period of 7) in the 260 weeks (5 years) following a cancer diagnosis, among patients with at least 5 years of follow-up and did not die from their index cancer.
