Table S5: Conflicts of interest

Study ID	Did the authors report any conflicts of interest?	Did the authors report any conflicts of interest? supporting text
Kersting 2000 [22]	Unclear	
Kim 2004 [23]	No	
Topaloglu 2004 [24]	Yes	Oncogenome Sciences.
de Fraipont 2005 [25]	Unclear	
Grote 2005 [26]	Unclear	
Schmiemann 2005 [27]	Unclear	
Schmidt 2010 [28]	Yes	Volker Liebenberg, Dimo Dietrich, Thomas Schlegel, Christoph Kneip, Anke Seegebarth, Nadja Flemming, Stefanie Seemann, Jörn Lewin, Juergen Distler, Ulrike Wille, and Reimo Tetzner are or have been employees and/or stockholders of Epigenomics AG, a company that aims to commercialize DNA methylation markers. John Field is a member of the Epigenomics Advisory Board.
Schramm 2011 [9]	Yes	Motic Company, China
Dietrich 2012 [29]	No	But they performed the study in order to get a CE marking for the Epi proLung BL Reflex Assay.
Nikolaidis 2012 [30]	Yes	J.R. Gosney has honoraria from Speakers Bureau and is a consultant/advisoryboard member of Eli Lilly, AstraZeneca, and Pfizer. No potential conflicts of interest were disclosed by the other authors.
van der Drift 2012 [10]	No	
Diaz-Lagares 2016 [31]	Yes	J. Zulueta has ownership interest (including patents) in VisionGate, Inc. No potential conflicts of interest were disclosed by the other authors
Konecny 2016 [32]	Unclear	
Ren 2017 [33]	No	
Zhang 2017 [34]	No	
Feng 2018 [35]	No	
Jeong 2018 [36]	No	
Um 2018 [37]	No	
Dong 2019 [38]	Yes	W. Yu and Shihua Dong report having a pending patent application.
Villalba 2019 [39]	No	
Rizk 2020 [40]	No	

Roncarati 2020 [41]	No	
Li 2021 [42]	Yes	Zhujia Ye, Hao Yang, Jinsheng Tao, Siyu Chen, Jiehan Xu, Yanying Liu, Weihe Liang, Bo Wang, Zhiwei Chen, Jian-Bing Fan are employees of AnchorDx Medi-cal Co, Ltd. or AnchorDx, Inc. All other authors declare no competing financial interest.
Wen 2021 [43]	Yes	NK Max outside of the submitted work.
Zeng 2021 [44]	Yes	Many authors were employed by Burning Rock Biotech.

### 3. Diagnostic properties of all genes in the included studies

Table S6: Sensitivity and specificity of included studies

Study ID	Gene name	Sens	Spec	AUC

Figure S1: Forest plot of sensitivity and specificity for the SHOX2 gene

**Figure S1.** Forest plot illustrating the sensitivity (orange) and specificity (gray) of the SHOX2 gene. The x-axis represents study sensitivity and specificity in percent. There are no whiskers, since many studies did not report a 95% confidence interval.

Figure S2: Forest plot of sensitivity and specificity for the RARbeta2 gene

**Figure S2.** Forest plot illustrating the sensitivity (orange) and specificity (gray) of the RARbeta2 gene. If a test and validation approach was used, both cohorts were included in the graph. The x-axis represents study sensitivity and specificity in percent. There are no whiskers, since many studies did not report a 95% confidence interval.
