

Fig. S3

Full unedited gel for figure 5A

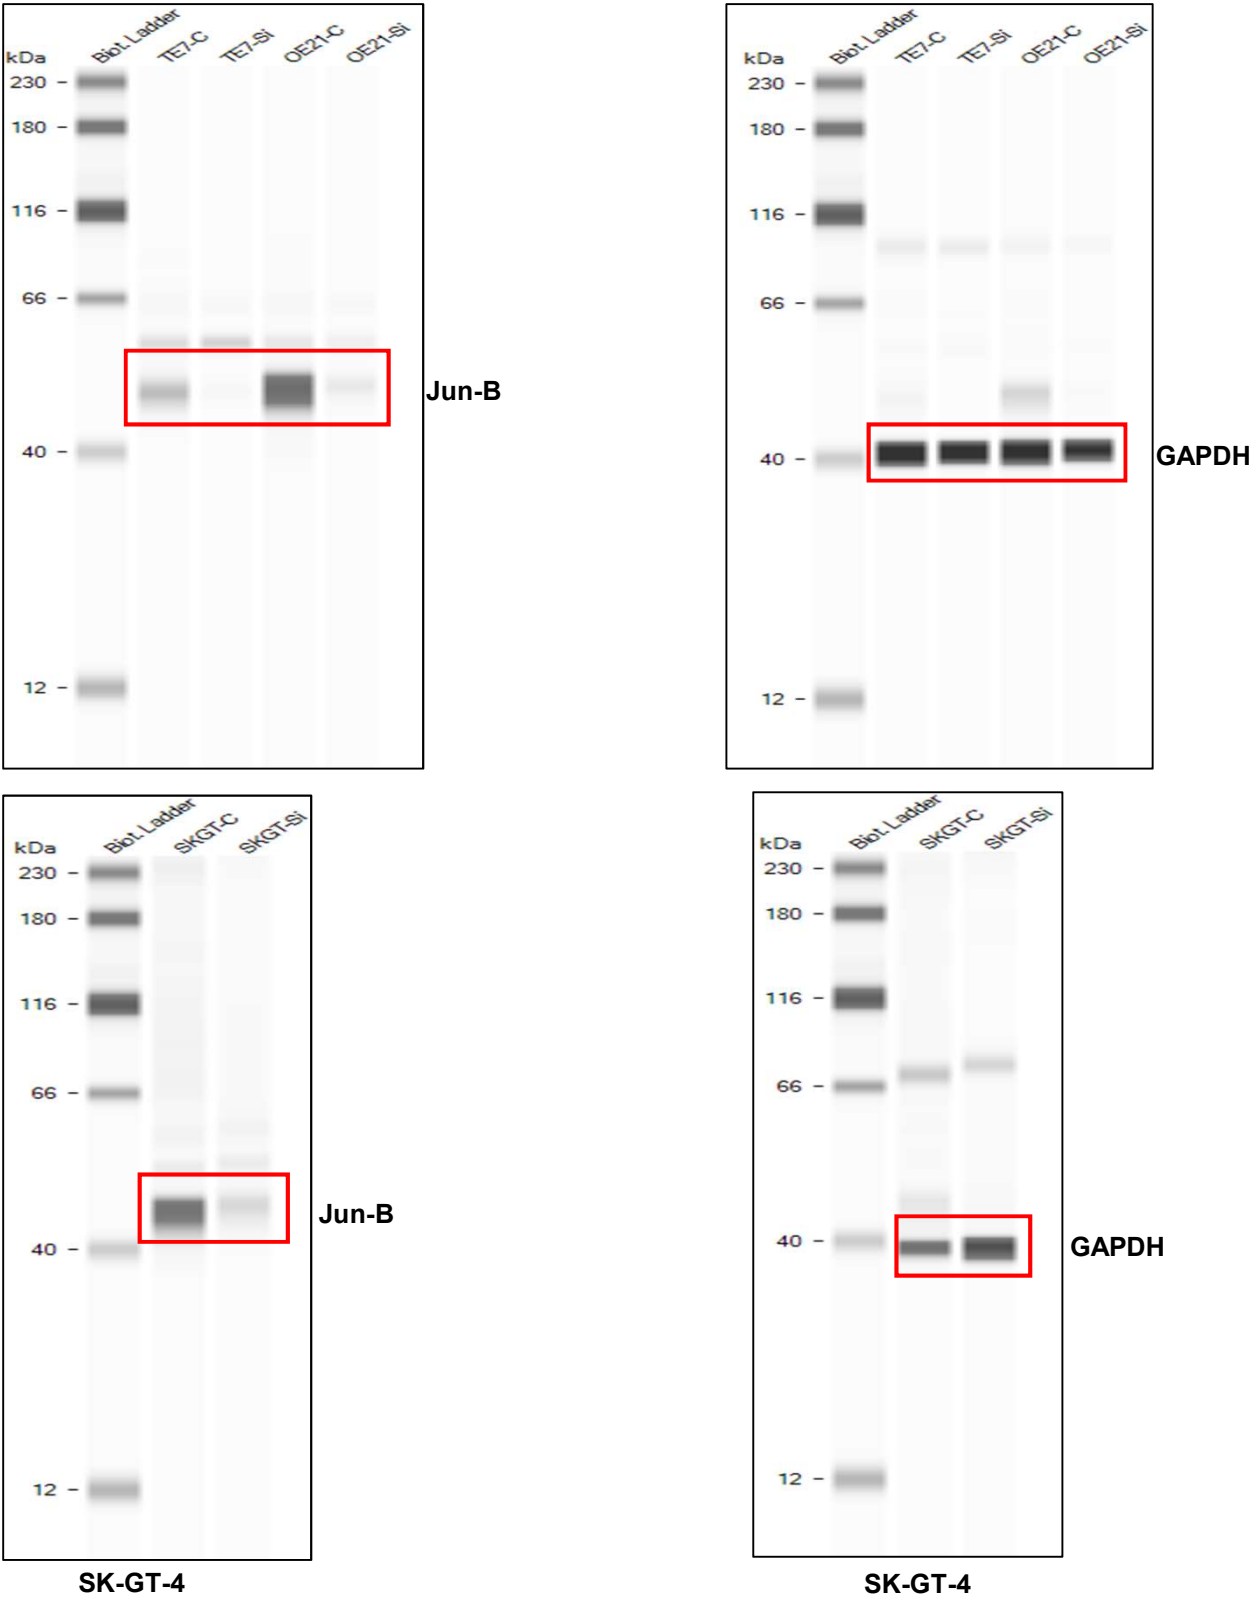

Fig. S3. Original blot for figure 5A . Changes in JunB protein expression following silencing with si-JunB RNA, in TE7 and OE21 (Top) and SK-GT-4 cells (bottom). Protein loading was assessed by GAPDH. These images were directly exported from the automatic Jess western system using Compass software. First lane in all the images represents biotin molecular weight ladder.
