The table displays data on Grade 3-4 toxicities in 43 patients who do not require dose reduction. Level 0: the patients do not receive dose reduction; Y = toxicity present; N= toxicity not present; Two patients who received only one cycle of therapy were not included in this analysis.

Table S2: Grade 3-4 adverse events (35 patients).

The table displays data on Grade 3-4 toxicities that required a dose reduction.

Level 1 corresponds to a 75% dose reduction while Level 2 corresponds to a dose reduction. Y = toxicity present N= toxicity not present
