

A

**Figure 2A:** Classic hyalinized solitary fibrous tumor

B

**Figure 2B:** Cellular variant of the tumor. The cellular SFT is characterized by a tightly packed proliferation of ovoid to spindle cells arranged around conspicuous vessels and scant stromal components.

**Figure 6.** Dedifferentiated Solitary Fibrous Tumor H&E staining. Two distinct areas of typical solitary fibrous tumor (upper part/short arrow) and high-grade pleomorphic sarcoma (lower part/long arrow).
