

Supplementary Figure S1 Prognostic factors of overall survival

A. Treatment response (CR vs others); B. Treatment response (CR+PR+HI+SD vs others); C. IPSS risk group; D. R-IPSS risk group; E. Cytogenetic risk (IPSS); F. Cytogenetic risk (IPSS-R); G. Complex karyotype; H. Monosomal karyotype.

CR: complete remission; PR: partial remission; HI: hematologic improvement; SD: stable disease; IPSS: International Prognostic Scoring System; IPSS-R: International Prognostic Scoring System revised
