Supplementary Materials

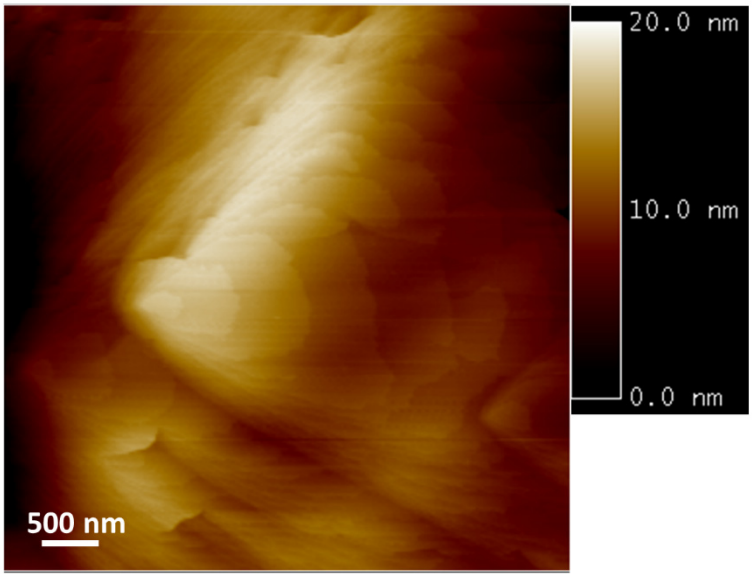

Figure S1. AFM height image of Figure 1c.

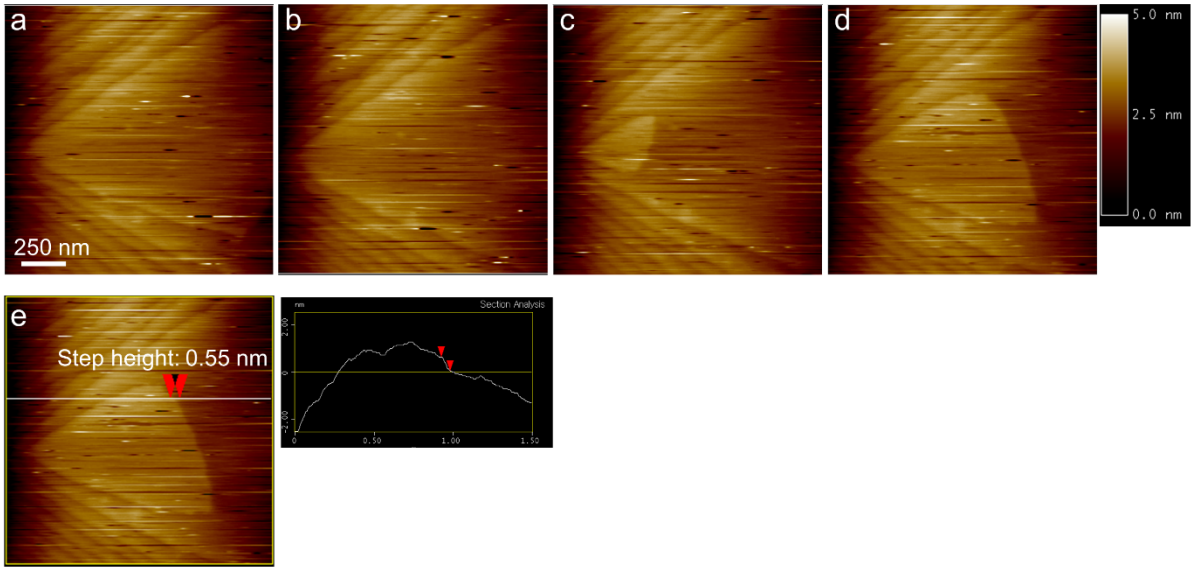

Figure S2. AFM height images of Figure 2a–d. (**e**) shows that the height of the moelcular step on the $(\bar{1}01)$ face shown in (**d**) is 0.55 nm by the section analysis.

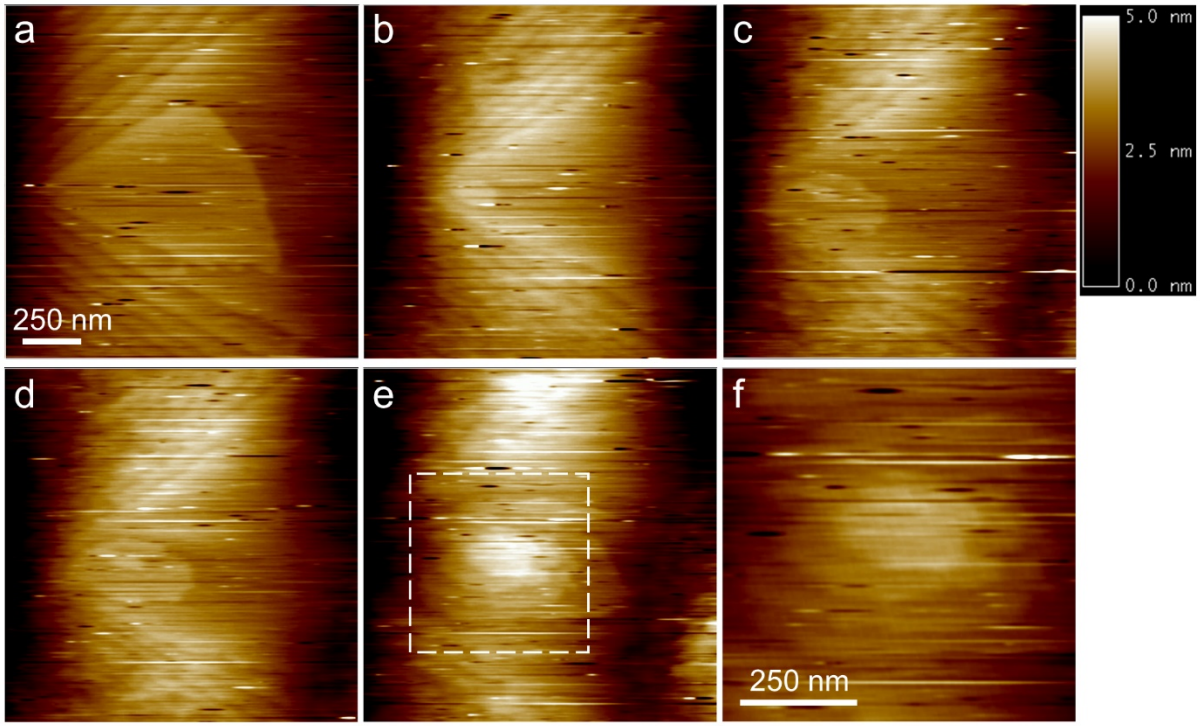

Figure S3. AFM height images of Figure 3. Images of (**a–e**) are in the same scan size and (**f**) is the magnified view of an area within a dashed box in (**e**).
