Structural Analysis of Aromatic Liquid Crystalline Polyesters

Henry Hall ^{1,*}, Samiul Ahad ¹, Robert Bates ¹, Maria Bertucci ², Cristina Contreras ¹, Alexandru Dospinoiu ¹, Guangxin Lin ¹, Nancy Singletary ² and Arpad Somogyi ¹

Additions to Table 4: Possible structures of anions detected from prepolymers 1 and 2 by ESI[−] and MS/MS held together by ester bonds only with molecular weights from 332–500.
