

Table S1. Correlation analysis results of quantitative characters of F1 generati.

Traits	Plant height	Crown width	Crown height ratio	Number of main branches	Inflorescence diameter	Number of ray florets	Number of flowers per plant	Days from planting period to coloring period	Days of florescence
Plant height	1								
Crown width	0.56**	1							
Crown height ratio	-0.35**	0.51**	1						
Number of main branches	0.18**	0.30**	0.128**	1					
Inflorescence diameter	0.17**	-0.05	-0.200**	0.06	1				
Number of ray florets	0.08*	-0.12**	-0.201**	0.01	-0.01	1*			
Number of flowers per plant	0.45**	0.71**	0.271**	0.21**	-0.24**	-0.08**	1**		
Days from planting period to coloring period	-0.32**	-0.27**	0.035	-0.08*	0.4	-0.29**	-0.24**	1	
Days of florescence	0.18**	0.14**	-0.020	0.08*	0.08*	0.42**	0.09**	-0.71	1*

** and * indicate significant different at 0.01 and 0.05 probability level, respectively.

Table S2. Genetic statistical analysis of plant height of hybrids.

Combination	Height of parents/cm			Height of hybrids/cm			Comparison of hybrids and parents			
	Female parent	Male parent	Mid-parent value	$\bar{X} \pm \sigma$	CV	Extremum	X/P	Less than low parent	Between parent	Greater than parent
