

Figure S2. Haplotype analysis of candidate genes. (a) Schematic representation of the gene structure and SNP positions in *Os01g0111400*. (b) Results of haplotype analysis of *Os01g0111400*. Yellow and blue blocks and gray lines indicate exons, untranslated regions, and intron regions, respectively. Black vertical bars represent SNPs and InDel regions. Hap: haplotype. Letters a and b represent significant differences at * $P < 0.05$ (Duncan's test).
