

Impact of engineered silver and zinc oxide nanoparticles on bacterial communities influencing soil health

Supplementary Material

Table S1: XRD data of ZnO ENPs- Crystallite size (nm) of nano ZnO.

Diffraction peaks (<i>h,k,l</i>)	Angle (°2θ)		FWHM (°2θ)		d-spacing (Å)		Crystallite Size (nm) of nano ZnO
	Bulk ZnO	Nano ZnO	Bulk ZnO	Nano ZnO	Bulk ZnO	Nano ZnO	
(100)	31.7576	31.6944	0.0816	0.1000	2.81539	2.82320	143
(002)	34.4092	34.3356	0.0816	0.3568	2.60426	2.61183	24
(101)	36.2412	36.1673	0.0816	0.1007	2.47670	2.48365	142
(102)	47.5270	47.4107	0.0816	0.1557	1.91159	1.91759	65
(110)	56.5826	56.4213	0.1020	0.3990	1.62526	1.63087	23
(103)	62.8437	62.8429	0.0816	0.4065	1.47755	1.47879	23
(112)	67.9336	67.8963	0.1020	0.5843	1.37870	1.38051	17

Figure S1: Characterization of silver ENPs : (a) TEM of silver ENPs; (b) UV-visible spectrum of silver ENPs.

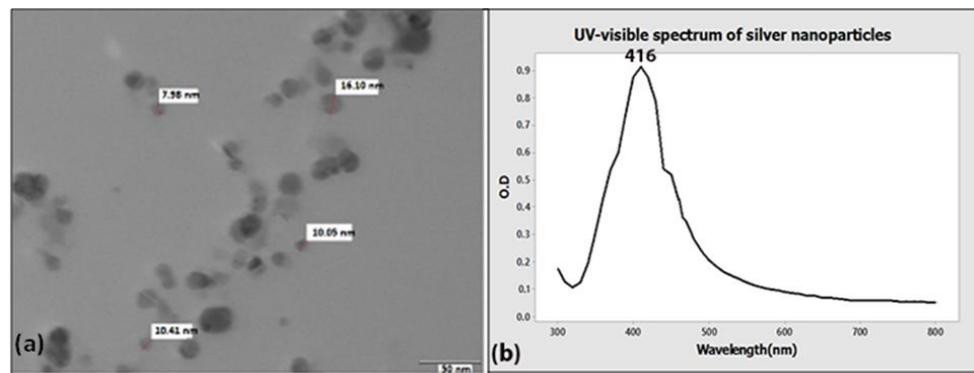

Figure S2: Characterization of zinc oxide ENPs: (a) XRD patterns of ZnO ENPs; (b) UV-visible spectrum of zinc oxide ENPs.

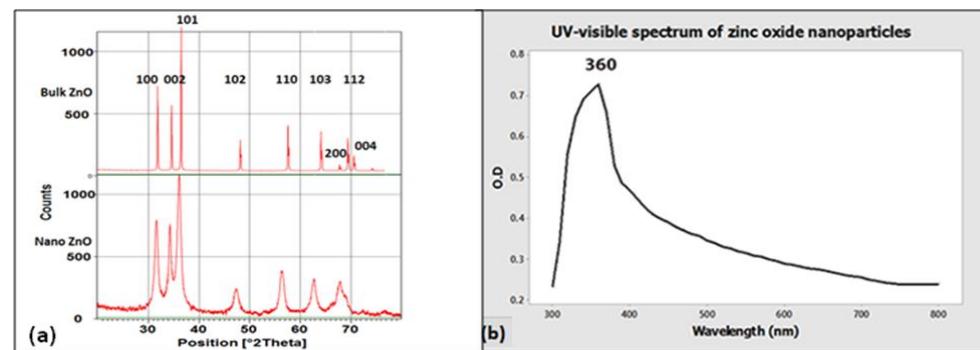

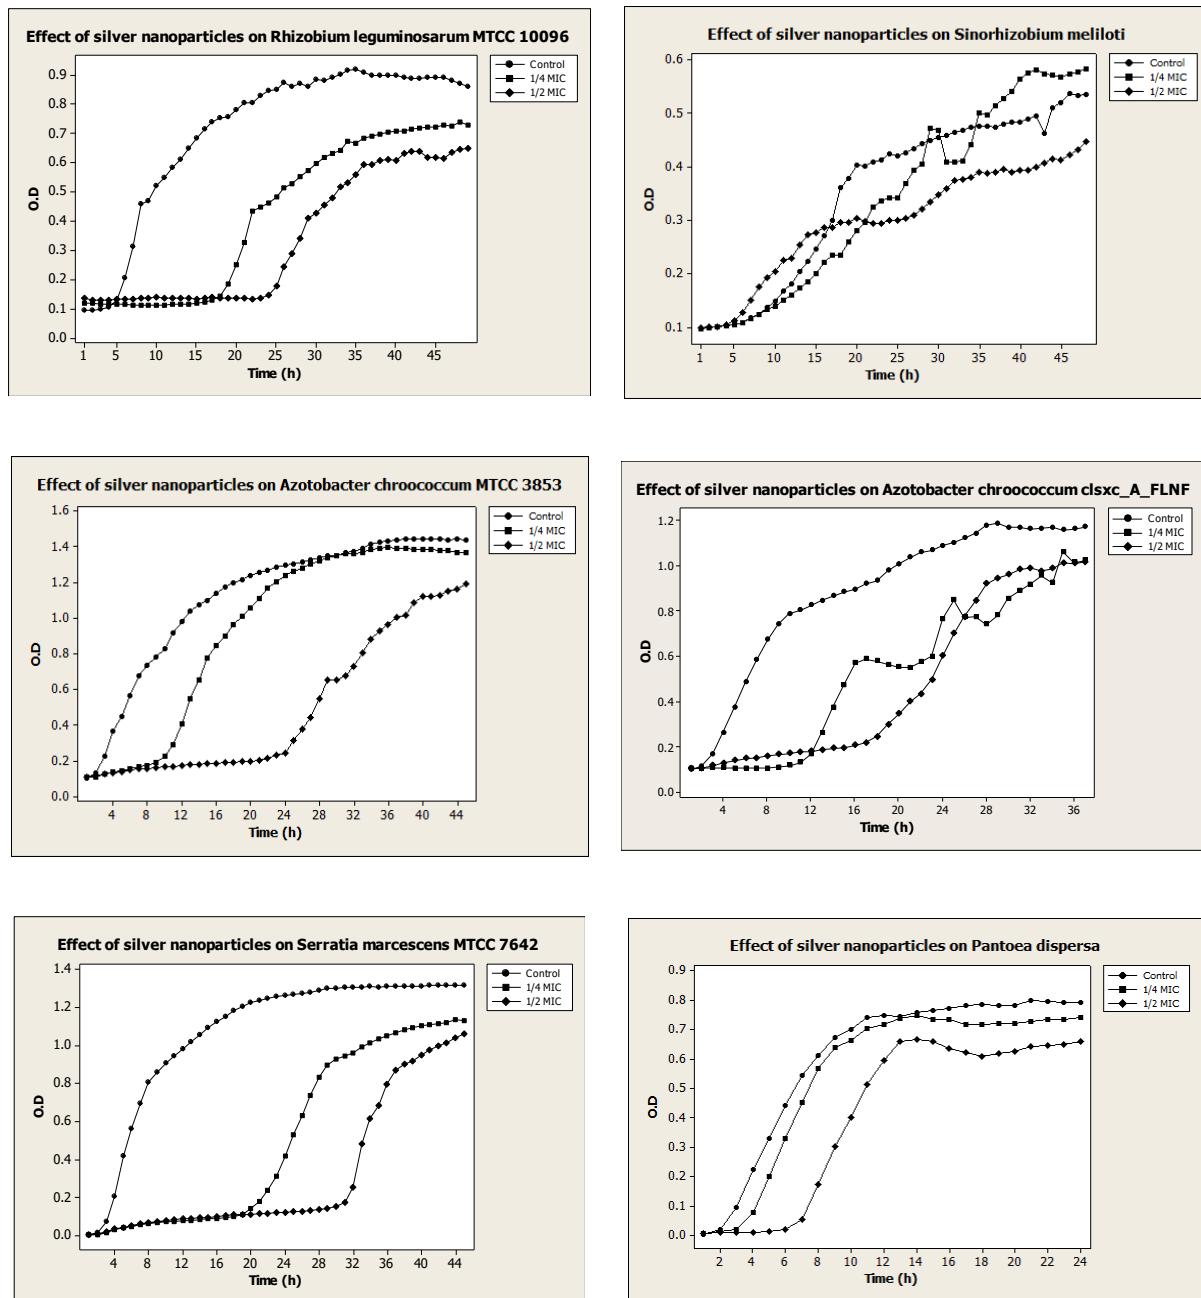

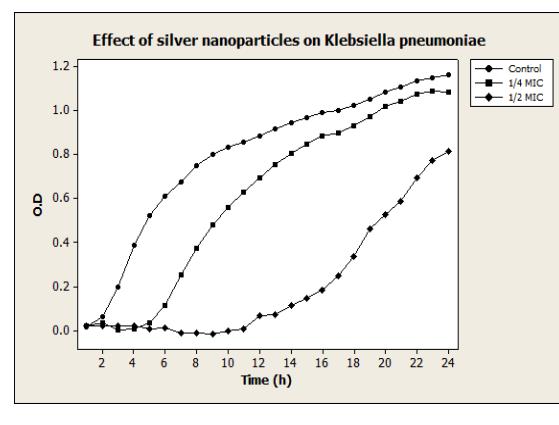

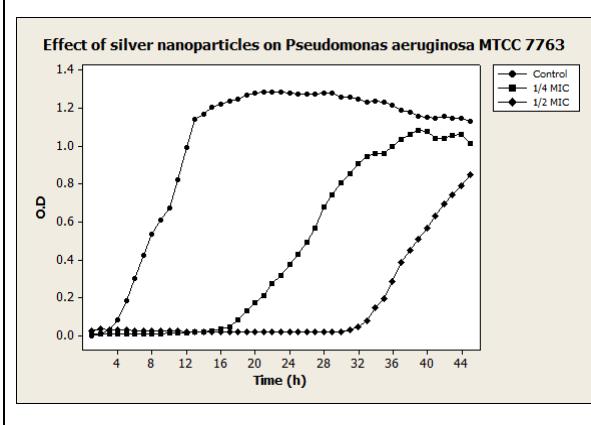

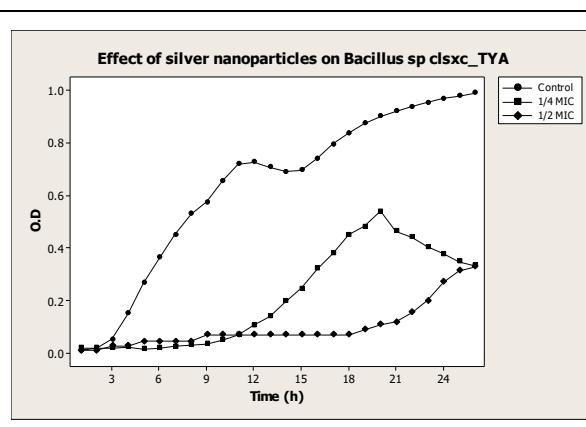

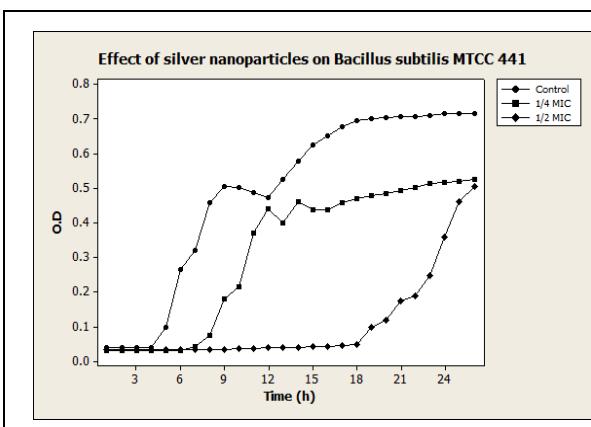

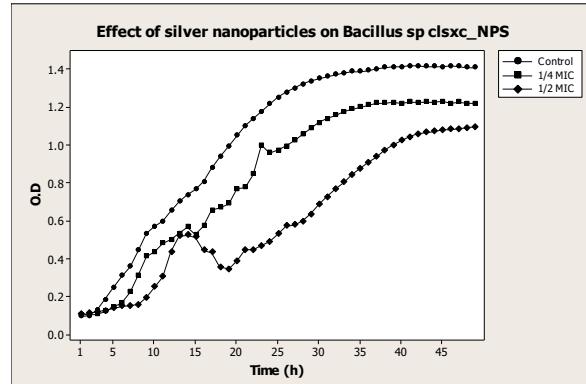

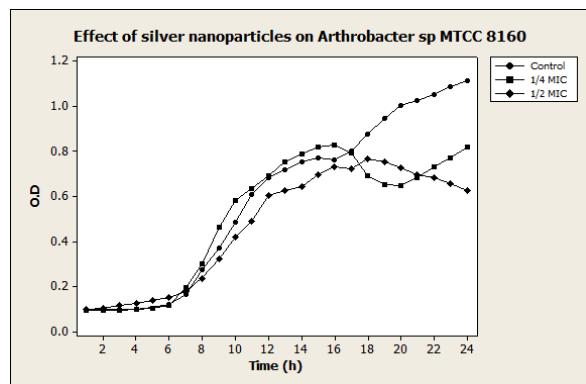

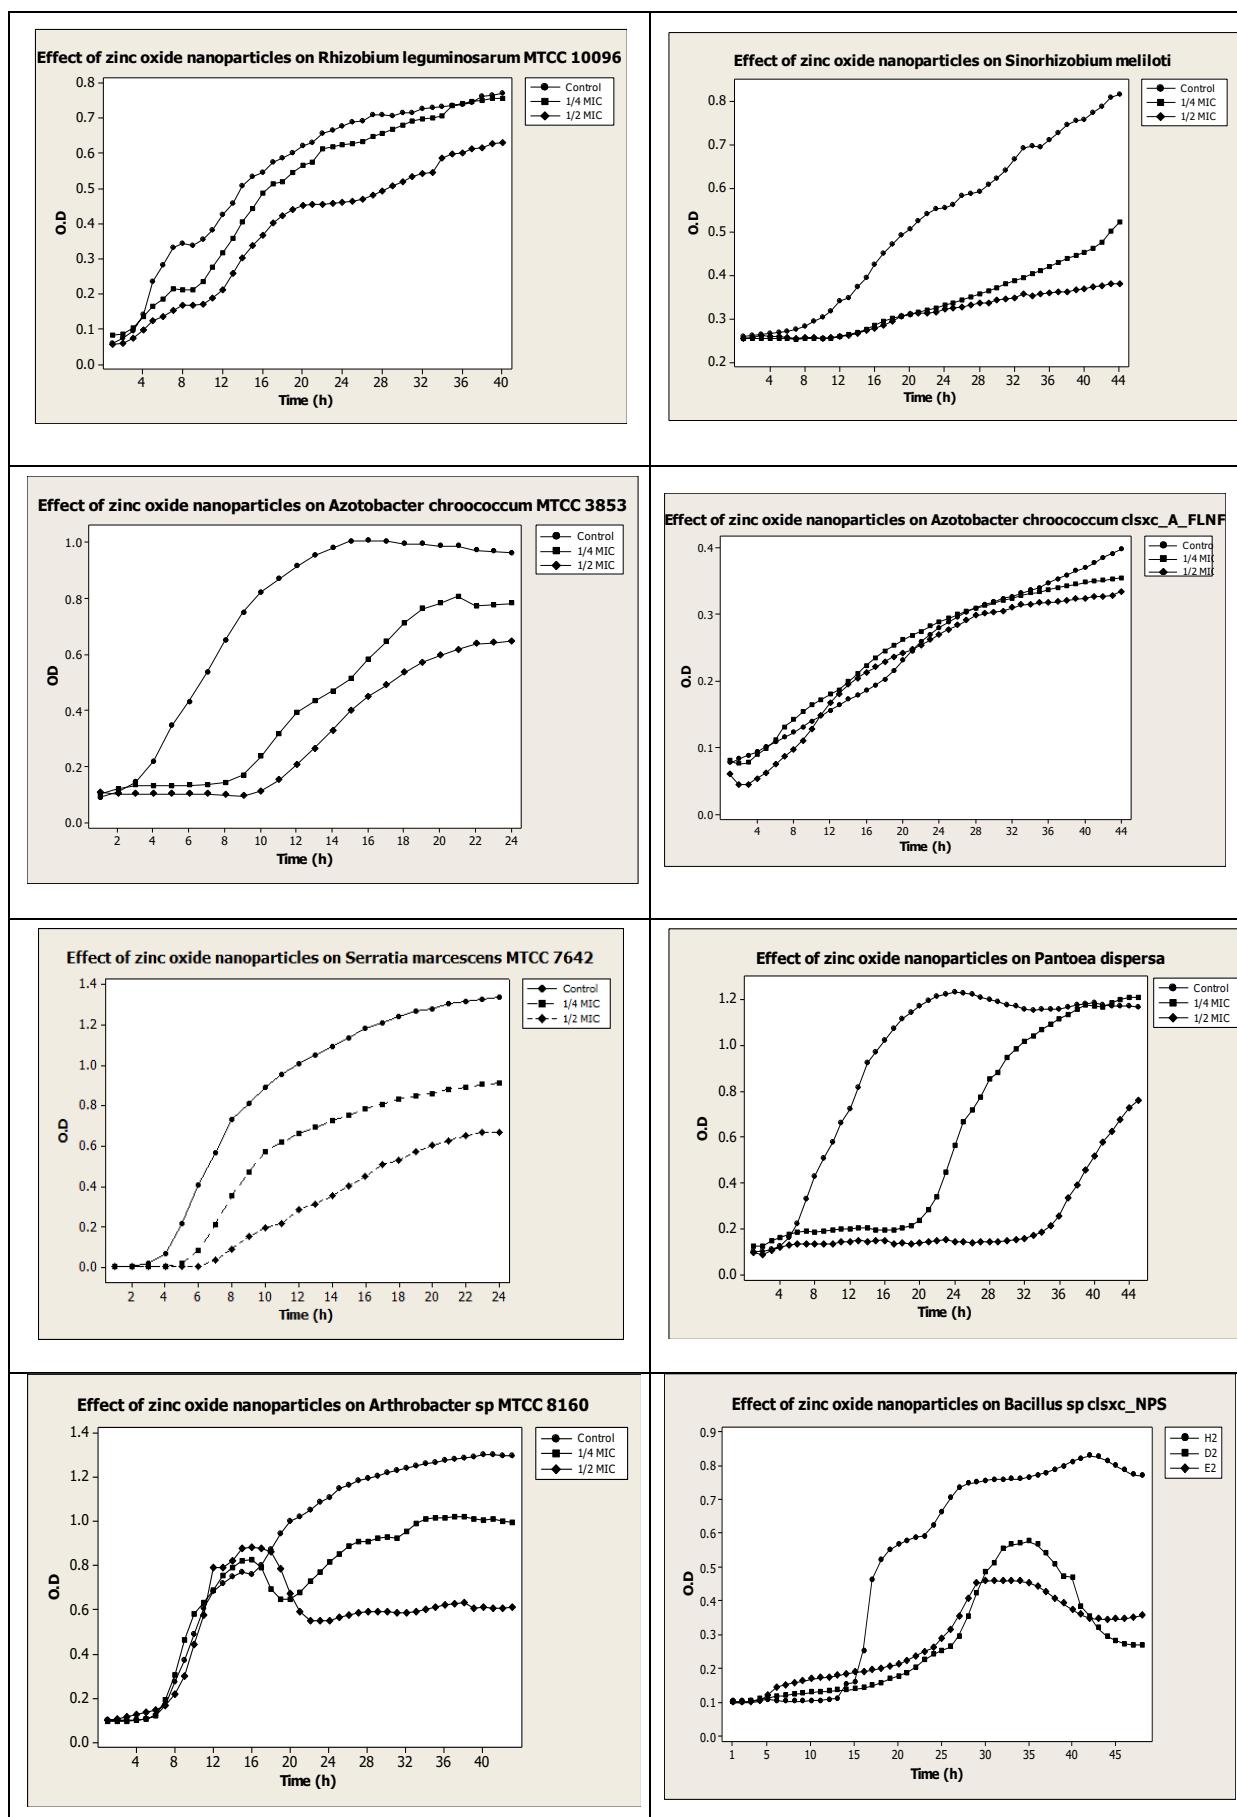

Figure S3: Growth response of isolates to Ag and ZnO ENPs (sub-MIC)
