

## Supplementary Figure S1

**Figure S1.** Effects of DIM on the cell viability of normal hepatocytes AML12. MTT assay evaluated the toxicity of DIM in the cell viability of AML12 cells. All data are from three separate experiments ( $n = 3$ ) and expressed as mean  $\pm$  SE. \*  $p < 0.05$ ; \*\*  $p < 0.01$ , and \*\*\*  $p < 0.001$ , significant difference compared to the control group.
