

A**B**

Supplementary Figure S1. Cytotoxic effect of deltamethrin on MMCs. Cells were treated with several concentrations of deltamethrin for 24 h (A) and 48 h (B). At the end of treatment, cell viability was evaluated using the AlamarBlue® cell viability reagent (Invitrogen, Grand Island, New York). Data represent mean \pm SEM from 3 independent experiments, each of which was performed in triplicate. Asterisk denotes significant difference from control ($p < 0.05$).
