

# Effects of nitisinone on oxidative and inflammatory markers in alkaptonuria: results from SONIA1 and SONIA2 studies

## Supplementary material

**Table S1.** Health questionnaires for SONIA2 patients.

Questionnaire	Description and items	Scale
<b>Knee injury and Osteoarthritis Outcome Score (KOOS)</b>	Describes short- and long-term consequences of knee injury in five subscales [ <i>pain, other symptoms, function in daily living, function in sport and recreation, and knee-related quality of life (QoL)</i> ]	<b>0</b> (extreme problems) <b>100</b> (no problems)
<b>Health Assessment Questionnaire (HAQ)</b>	Includes a <i>disability index (haqdi)</i> and a <i>global pain visual analog scale (hapvas)</i>	<b>0</b> (no difficulties) <b>3</b> (unable to do).
<b>Short Form-36 (SF-36)</b>	A multi-purpose short form questionnaire with 36 questions addressing both <i>physical</i> and <i>mental</i> components	<b>0</b> (maximum disability) <b>100</b> (no disability).
