

Manuscript Supplementary
Figure S1.

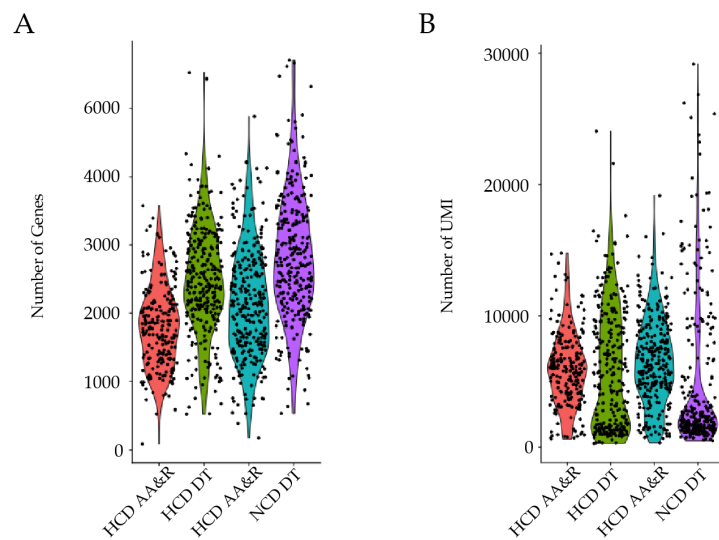

Figure S1. Quality control of the profiled scRNAseq transcriptomes of CD45⁺ cells derived from atherosclerosis-prone AA&R, and atherosclerosis-resistant DT aorta of *Apoe*^{-/-} mice on NCD and HCD. (A) Violin plots showing the quality control metrics of (A) number of genes detected; (B) number of Unique molecular identifiers (UMI) n=6 mice.

Figure S2.

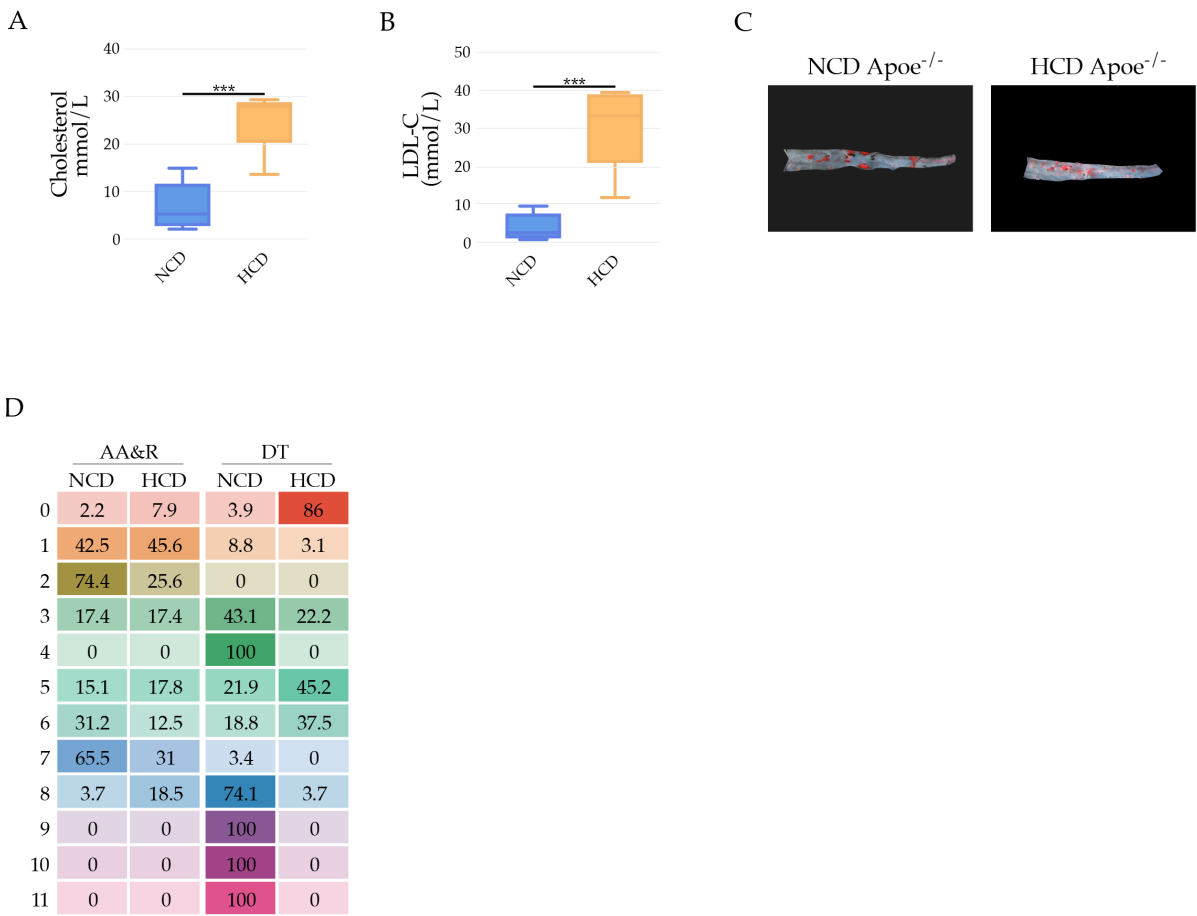

Figure S2. Bar graphs represent the mean \pm SEM (A) cholesterol; (B) LDL-C, $n=6$ mice/group, and *** $p < 0.001$. (C) Representative images of Oil Red O stained abdominal aorta of *Apoe*^{-/-} on NCD and HCD. (D) Relative frequency of cells derived from AA&R and DT aorta of *Apoe*^{-/-} mice on NCD and HCD composing the 12 clusters.

Figure S3

Figure S3. Heat map of top differentially expressed genes among all detected 12 clusters.

Figure S4

Figure S4. GO terms enrichment analysis of AA&R and DT aorta derived clusters of *Apoe*^{-/-} on NCD and HCD. Bubble plot of selected GO terms enrichment analysis of: (A) cluster 0; (B) cluster 1; (C) cluster 3, (D) cluster 5, (E) cluster 6; (F) cluster 7; (G) cluster 8, (H) cluster 9 and (I) cluster 10. Dot

size is proportional to the number of genes overlapping with each GO term, and the adjusted p -value is colour-coded from red to blue.

Figure S5.

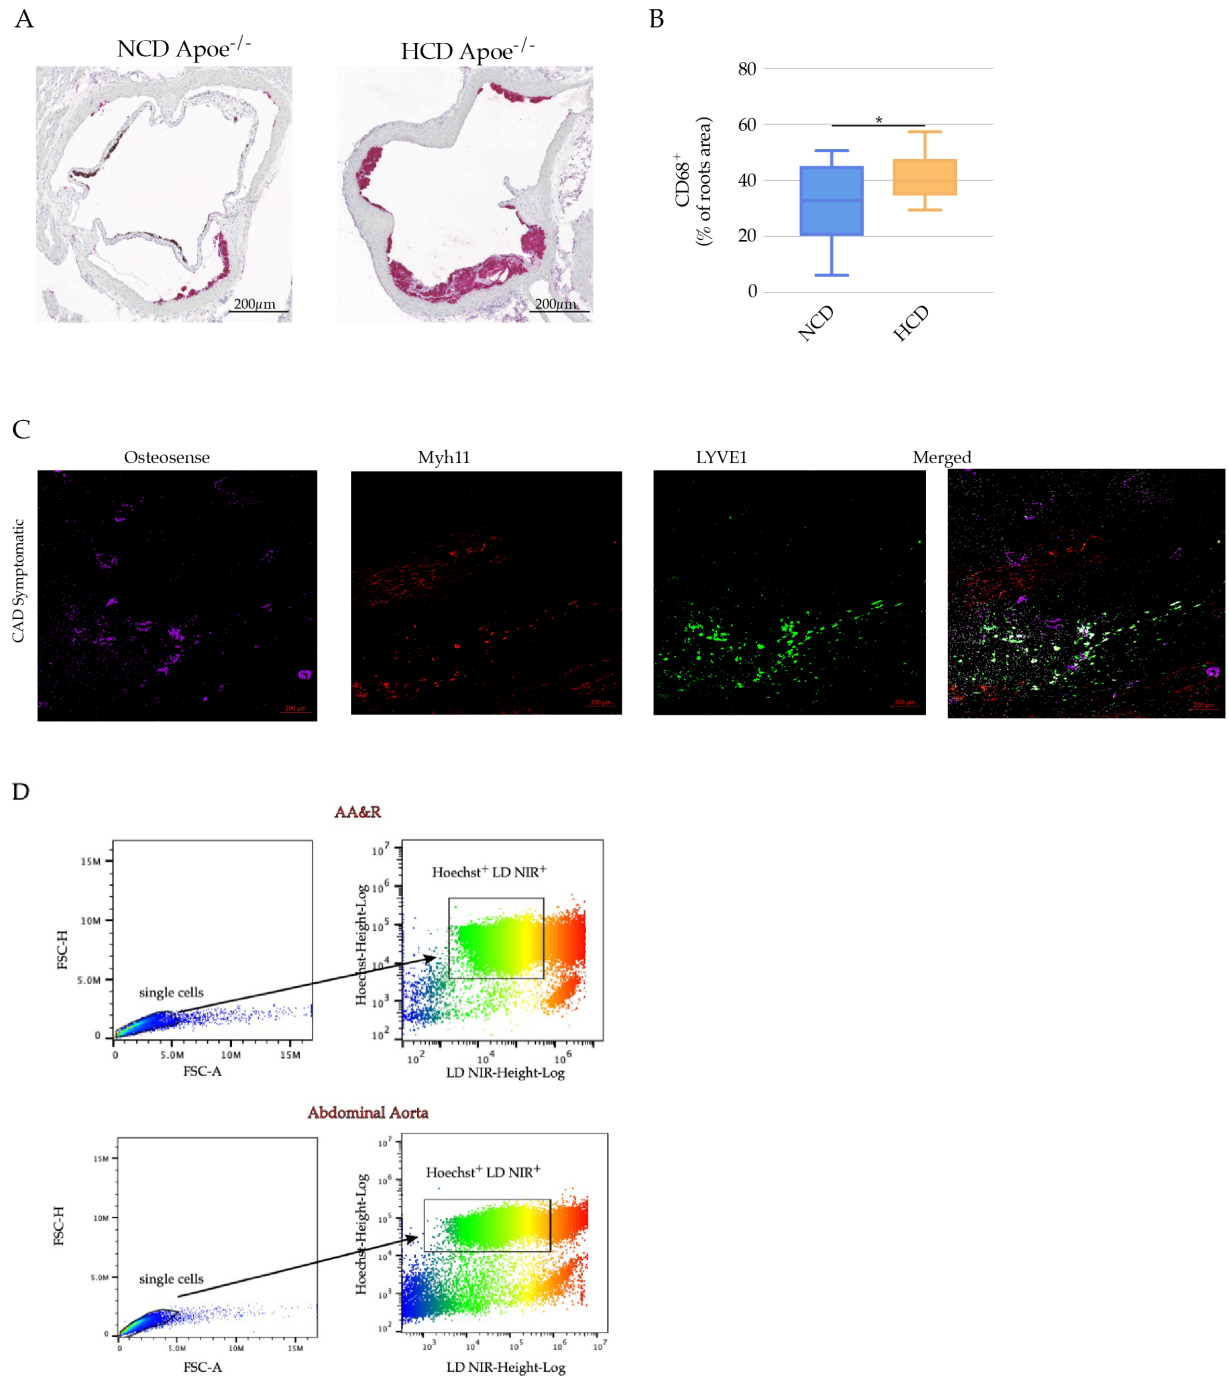

Figure S5. (A) Representative images of CD68 positive cells-stained aortic roots of *Apoe*^{-/-} on NCD and HCD. (B) Bar graphs represent the mean \pm SEM of total CD68 positive cells in aortic roots of *Apoe*^{-/-} on NCD and HCD, $n=6$ mice per group and $*p < 0.05$. (C) Representative immunofluorescence staining showing LYVE1 (green) expression in close proximity to VSMC (Myh11 positive staining in red) in

atherosclerotic lesions in areas of microcalcification as indicated by Osteosense positive staining (purple) in symptomatic CAD patients. (D) Dotplots showing exclusion of doublets and LIVE/DEAD Fixable Near-IR Dead Cell Dye positive cells and selection of Hoechst cells in the aortic arch and root and abdominal aorta, before gating for markers of interest.

Supplementary Table S1
