

## Supplementary Materials

**Supplementary Table S1: Group Summaries for RNA Sequencing**

Group 1		13-week-young naïve		
Samples	Sample Number	RIN	Concentration	
1	YNR1	9.2	2298	pg/μl
2	YNR2	9.2	3469	pg/μl
3	YNR3	9.7	3859	pg/μl
4	YNR4	9.8	2498	pg/μl

Group 2		40-week-old naïve		
Samples	Sample Number	RIN	Concentration	
1	ONR1	9.5	26187	pg/μl
2	ONR2	9.8	11981	pg/μl
3	ONR3	9.7	14769	pg/μl
4	ONR4	9.9	12499	pg/μl

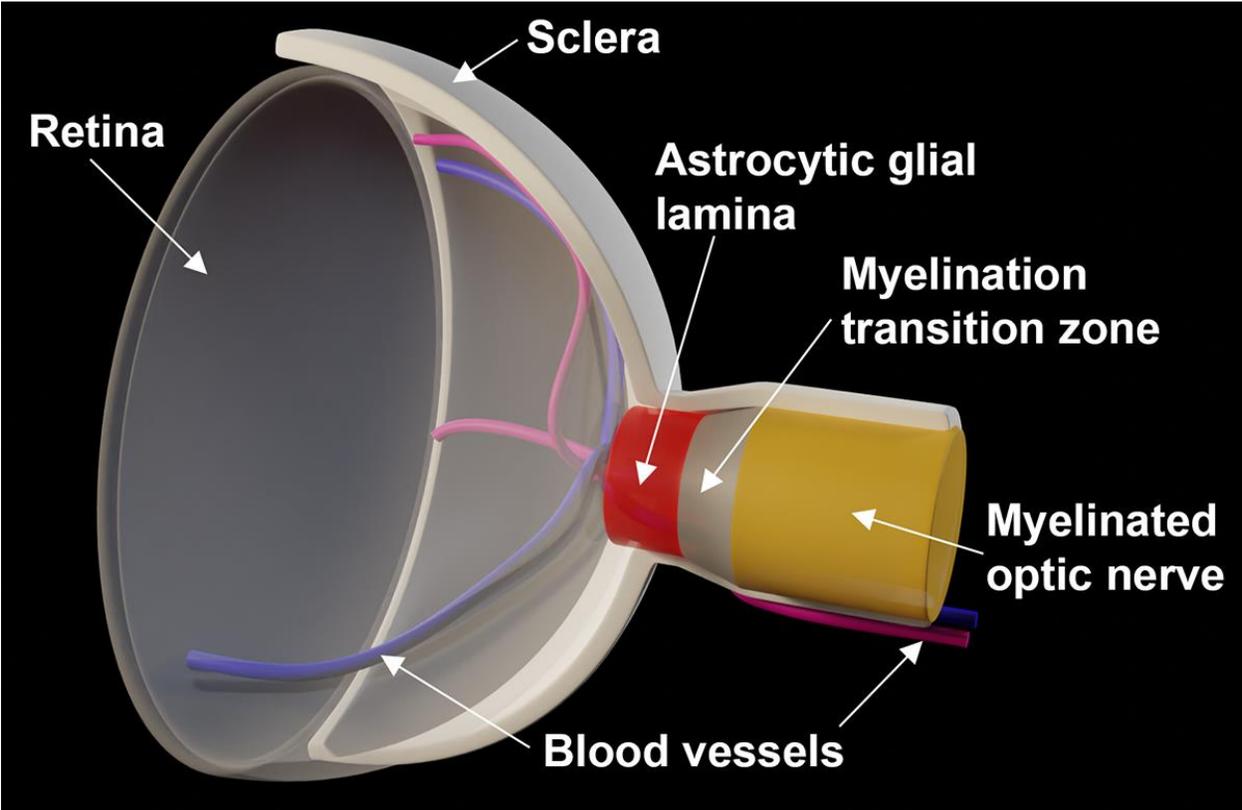

Group 3		4-week saline injection group		
Samples	Sample Number	RIN	Concentration	
1	4SR1	9.2	1170	pg/μl
2	4SR2	9.5	600	pg/μl
3	4SR3	9.3	543	pg/μl
4	4SR4	9.3	3115	pg/μl

Group 4		4-week bead injection group		
Samples	Sample Number	RIN	Concentration	
1	4BR1	9.1	2363	pg/μl
2	4BR2	9	4175	pg/μl
3	4BR3	9.2	3718	pg/μl
4	4BR4	9.3	3380	pg/μl

Supplementary Figure S1: Schematic of the optic nerve

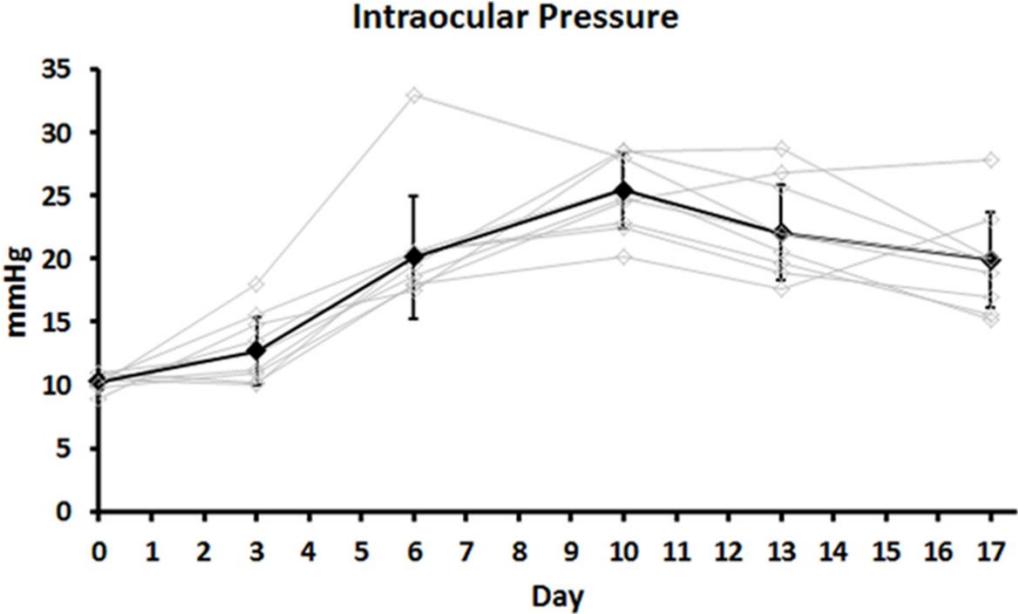

Supplementary Figure S2: Principal Component Analysis

Scatter plot of the first 3 components, Principal Component Analysis of differentially expressed genes in microbead-injected nerves (red symbols), saline-injected nerves (green), young naïve nerves (black), and aged naïve nerves (blue).

Supplementary Figure S3: Intraocular pressure (IOP) after microbead injection

IOP curves after microbead injection into the anterior chambers of B6.*hGFAPpr::EGFP* mice. Thin grey lines represent individual eyes, and the bold black line shows the population average. Error bars represent the standard deviation.
