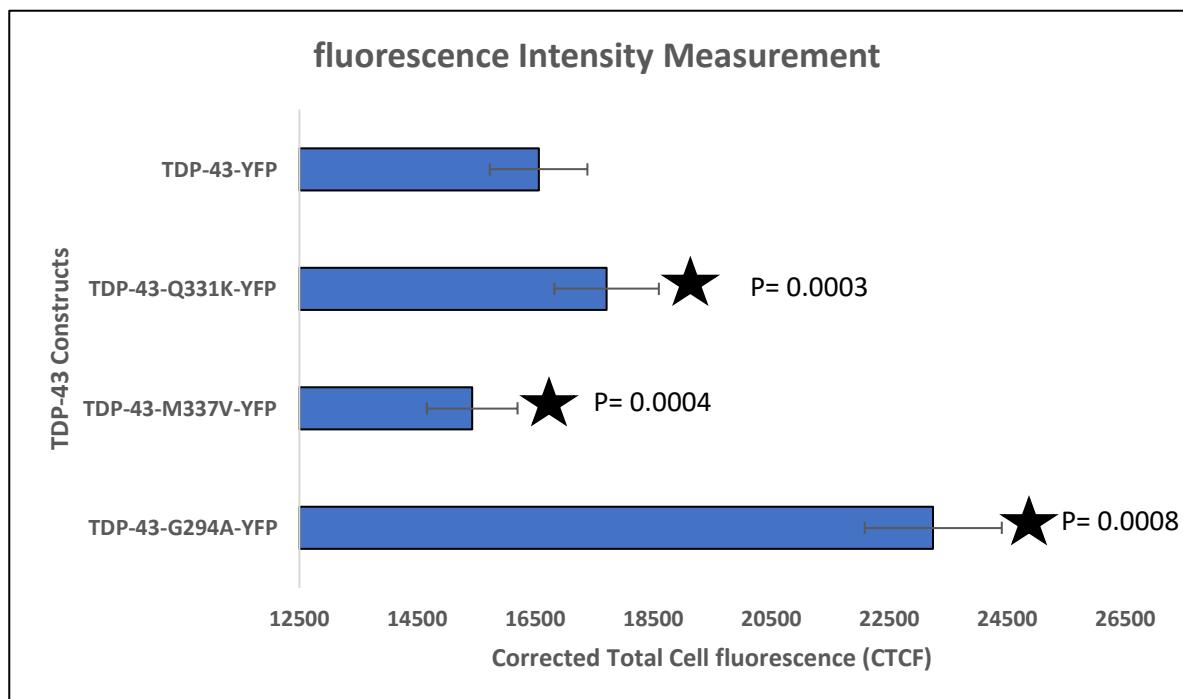

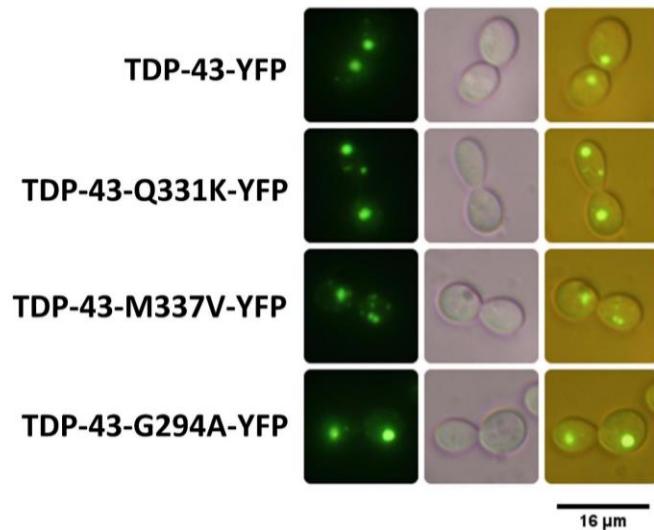

Figure S1: Fluorescence images (dark field, bright field and overlay) and bar graph representing results obtained from fluorescence studies of TDP-43 transformed *Saccharomyces cerevisiae*.

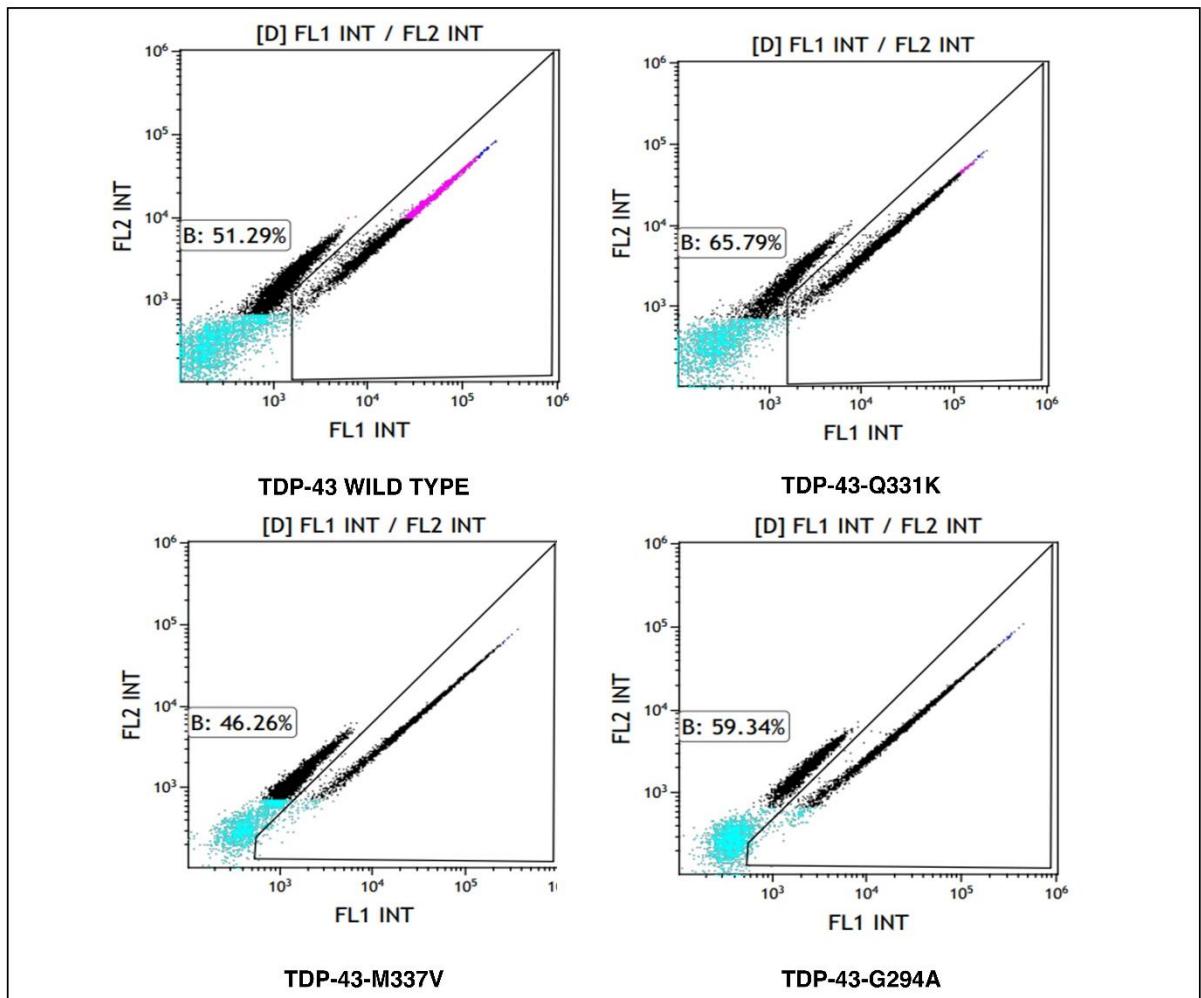

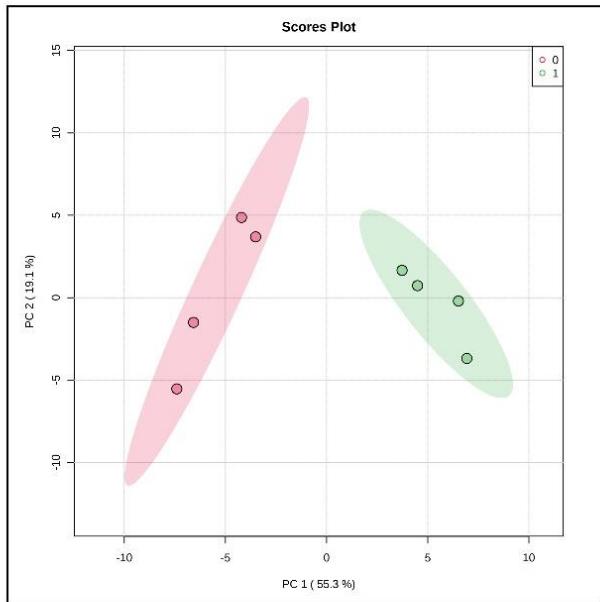

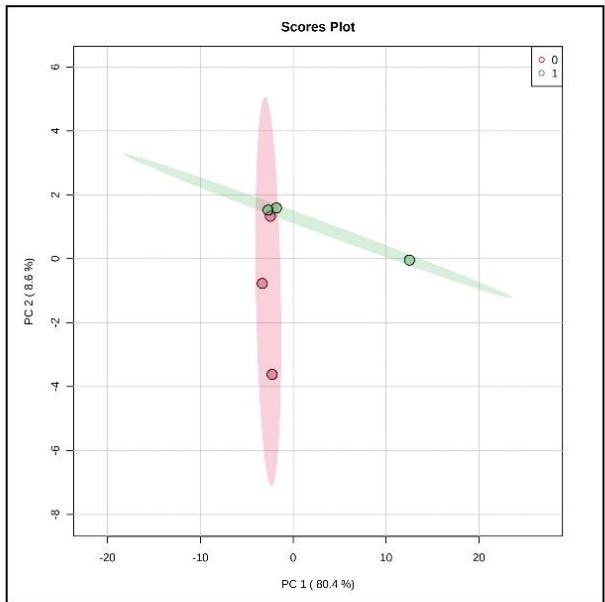

Figure S2: Scatter plot representing results obtained from flow cytometry analysis of TDP-43 transformed *Saccharomyces cerevisiae* using Beckman Coulter Flow Cytometer. Percentage of pure E-YFP expressing cells were obtained using FL1 and FL2 LASERS. The results obtained were concordant with the results obtained from fluorescence quantification of microscopic images.
