Values are given as mean±SE for 5 rats in each interval in each group (n=20).

Each value not sharing a common letter superscript is significantly different (P<0.05).

* Mean values differ significantly within the group (P<0.05).

Values are given as mean±SE for 5 rats in each interval in each group (n=20).

Each value not sharing a common letter superscript is significantly different (P<0.05).

* Mean values differ significantly within the group (P<0.05).
