Table S1. Results of the Mouse Adipogenesis RT² Profile Array. Fold changes labelled in red indicate upregulated genes while those labelled in green indicate downregulated genes in the Tks4-KO gWAT relative to their levels in the WT animals. The up- and downregulated genes in the table were included in the ARN analysis, the results of which are presented in Figure 3E. The statistical significance of the $2^{-\Delta CT}$ data was assessed via unpaired Student's t-tests.
