Basal-type Breast Cancer Stem Cells over-express chromosomal passenger complex proteins.

Angela Schwarz-Cruz_y_Celis, et. al.

Supplementary Figure 1. Enriched signaling cascade of gene isoforms upregulated in breast Cancer Stem Cells the -log p value for the gene ratio is shown(lines). In addition, the z score, which reflects the direction of the activation is shown in the bars. Data generated using the Ingenuity Pathway Analysis (IPA) suite.
