

Supplementary data

Supplementary figure 1. The effect of IL-6 signaling in tube formation of vascular ECs when added to the Matrigel at the same time as the cells. Representative images from tube formation of (A) unstimulated ECs or (B) ECs treated with IL-6 alone or (C) in combination with sIL-6R. Quantification of the tube formation is presented as (D) total tube length, (E) number of branching points and loop count (F). Data is presented as mean \pm SEM of 3 experiments each run-in duplicate.

Supplementary figure 2. Olink normalized protein expression (NPX) data on the expression of IL-6 after knockdown using stealth siRNAs. Data is presented as mean \pm SEM of 4 experiments each run-in duplicate. ** $p < 0.01$ compared to control.

Supplementary figure 3. Tube formation of vascular ECs which have been pre-treated with IL-6 alone or in combination with sIL-6R on growth-factor-reduced (GFR) Matrigel. Representative images from tube formation of (A) unstimulated ECs or (B) ECs treated with IL-6 alone or (C) in combination with sIL-6R. Quantification of the tube formation is presented as (D) total tube length, (E) number of branching points and loop count (F). Data is presented as mean ± SEM of 4 experiments each run-in duplicate.

Supplementary table 1. List of genes with Assay IDs in the angiogenesis array and respective $\Delta\Delta C_t$ values, p-values and BH-p-values.

Assay ID	Target Name	$\Delta\Delta C_t$ values	P-value	BH p-value
