

**Supply Figure 1.** Expression level of *POU2F1* in different organ tissues of Black Rex rabbit. *POU2F1* expression in the jejunum was used as the control to calculate the relative expression fold changes of *POU2F1* in other organ tissues. White, gray, and black bar were the *POU2F1* expression level normalized by *Beta-actin*, *HPRT1*, and *GAPDH* respectively.
