

Supplementary Materials:

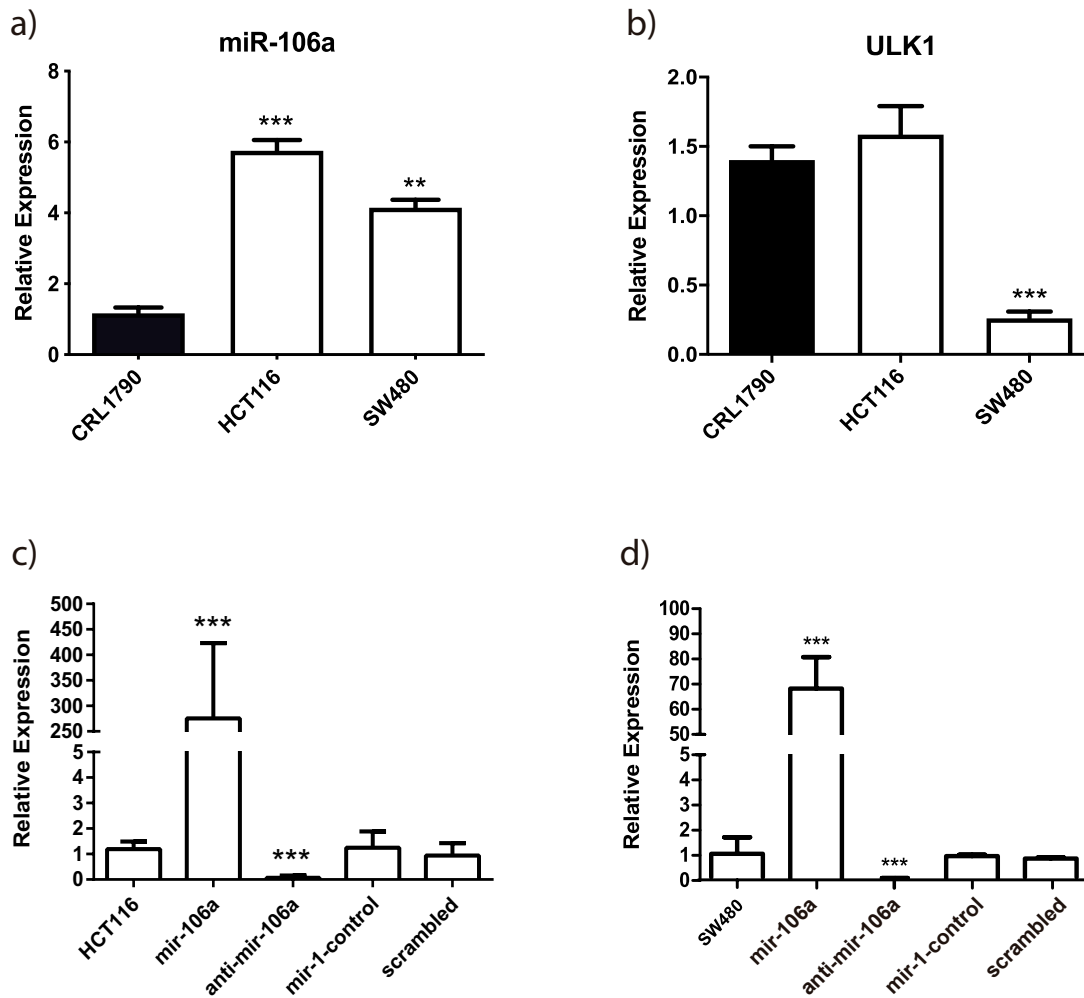

Figure S4. a) and b) Expression of mir-106a and ULK1 in HCT116 and SW480 (CRC cell lines) compared with CRL1790 (normal cells), normalized with RNU6 or GAPDH, respectively. *** $p < 0.001$, ** $p < 0.01$. c) and d) Successful transfection of mir-106a mimic, inhibitor and controls was detected by means of qPCR in HCT116 and SW480 cells. ***($p < 0.001$).
