

Discovery and functional characterization of two regulatory variants underlying lupus susceptibility at 2p13.1

**Supplementary Figure S1.** Relationship between expression levels of *DGUOK* and *DGUOK-AS1* across four Coriell lines studied with single-cell RNA-seq

**Supplementary Figure S2.** GTeX (V8) data show significant sQTLs to anti-sense RNA *DGUOK-AS1* across multiple tissues with rs6705628 (top row) and rs2272165 (bottom row)
