

Figure S2. Electropherograms of three goats with silent mutations. (a) codon W34W in the 5' UTR with adenine silent mutation (GenBank ID: ON015426); (b) codon W34W in the 3' UTR with thymine silent mutation (GenBank ID: ON015426); (c) codon W34W in the 5' UTR with adenine silent mutation (GenBank ID: ON015429); (d) codon W34W in the 3' UTR with thymine silent mutation (GenBank ID: ON015429); (e) codon W34W in the 5' UTR with adenine silent mutation (GenBank ID: ON015440); (f) codon W34W in the 3' UTR with thymine silent mutation (GenBank ID: ON015440). The colours (green: adenine; blue: cytosine; black: guanine; red: thymine) indicate individual bases of DNA sequence using an automatic sequencer ABI PRISM 3130 (Applied Biosystems).
