

Supplementary Figure S1. Sensitivity of Nalm-6 cells pretreatment with NU7026 to genistein. Nalm-6 cells were treated with 10 μM NU7026 for 1 hour, then cultured with growth medium containing various concentration of genistein for 96 hours. Subsequently, cell growth was measured using the CellTiter-Glo Luminescent Cell Viability Assay Kit (Promega, Fitchburg, WI, USA) (n=1).
