

# Spatiotemporal Distribution of Precipitation over the Mongolian Plateau during 1976–2017

Yingying Xia <sup>1,2,3\*</sup>, Dan Dan <sup>1,2,3</sup>, Hongyu Liu <sup>1,2,3</sup>, Haijun Zhou <sup>1,2,3</sup> and Zhiqiang Wan <sup>1,2,3</sup>

**Table S1** Altitude statistics of Mongolian Plateau stations

| Elevation/m | <500 | 500-1000 | 1000-1500 | 1500-2000 |
|-------------|------|----------|-----------|-----------|
| Stations    | 3    | 7        | 121       | 4         |
| Proportion  | 2%   | 5%       | 90%       | 3%        |

**Table S2** The forecasted annual average precipitation using different interpolation methods during 1976-2017

| Station                     | Measured value | Predictive value |         |
|-----------------------------|----------------|------------------|---------|
|                             |                | IDW              | Kriging |
| Bayankhongor                | 195.17         | 217.55           | 212.2   |
| Buyante                     | 92.51          | 140.03           | 141.64  |
| Dalanzadgad                 | 128.33         | 110.11           | 109.14  |
| Zamyn-Uud                   | 136.87         | 136.12           | 152.21  |
| Altai                       | 179.46         | 191.81           | 165.96  |
| Qiaoyier                    | 174.41         | 164.36           | 140.48  |
| Baruunturuun                | 225.09         | 177.55           | 163.43  |
| Ulaangom                    | 142.99         | 133.53           | 143.01  |
| Bulgan                      | 328.45         | 293.42           | 275.42  |
| Olgii                       | 120.40         | 130.49           | 128.19  |
| Zhu Rihe                    | 202.69         | 277.21           | 270.51  |
| Huade                       | 318.61         | 319.26           | 328.47  |
| Linxi County                | 366.32         | 342.9            | 343     |
| Kailu County                | 326.15         | 351.48           | 377.24  |
| New Chen Balhu Left Banner  | 279.02         | 306.58           | 319.88  |
| New Chen Balhu Right Banner | 237.48         | 285.37           | 274.72  |
| Baotou                      | 305.79         | 316.77           | 298.78  |
| Hohhot                      | 405.08         | 396.13           | 359.83  |
| East Ujimqin Banner         | 250.45         | 285.06           | 290.96  |
| West Ujimqin Banner         | 328.13         | 335.09           | 324.26  |

**Table S3** The interpolation analysis of the mean annual precipitation during 1976-2017

| Test indicators | Interpolation method | IDW   | Kriging |
|-----------------|----------------------|-------|---------|
| MAE             |                      | 23.71 | 29.87   |
| RMSE            |                      | 30.02 | 36.04   |

**Table S4** Annual precipitation in different stages and its correlation with EASMI and WI

| Stage                                       | 1976-1982 | 1983-1998 | 1999-2010 | 2011-2017 |
|---|-----------|-----------|-----------|-----------|
| Annual average precipitation/mm             | 230.6     | 255.1     | 212.6     | 258.4     |
| Correlation between precipitation and EASMI | 0.42      | 0.46      | 0.31      | 0.69      |
| Correlation between precipitation and WI    | -0.09     | -0.28     | -0.22     | -0.52     |

**Table S5** Precipitation change rate at 135 stations during 1976-2017 in the Mongolian Plateau

| Season | Significant increase<br>( $P < 0.05$ ) |            | Not significant<br>increase ( $P > 0.05$ ) |            | Stable ( $P > 0.05$ ) |            | Not significant<br>decrease ( $P > 0.05$ ) |            | Significant decrease<br>( $P < 0.05$ ) |            |
|--------|--|------------|--|------------|-----------------------|------------|--|------------|--|------------|
|        | Stations                               | Percentage | Stations                                   | Percentage | Stations              | Percentage | Stations                                   | Percentage | Stations                               | Percentage |
| Annual | 6                                      | 4%         | 34   | 25%        | 55                    | 41%        | 37   | 28%        | 3                                      | 2%         |
| Spring | 23                                     | 17%        | 63   | 47%        | 42                    | 31%        | 5  | 4%         | 2                                      | 1%         |
| Summer | 4                                      | 3%         | 14   | 10%        | 45                    | 33%        | 63   | 47%        | 9                                      | 7%         |
| Autumn | 25                                     | 19%        | 48   | 36%        | 53                    | 38%        | 9  | 7%         | 0                                      | 0          |
| Winter | 31                                     | 23%        | 45   | 33%        | 41                    | 31%        | 14   | 10%        | 4                                      | 3%         |

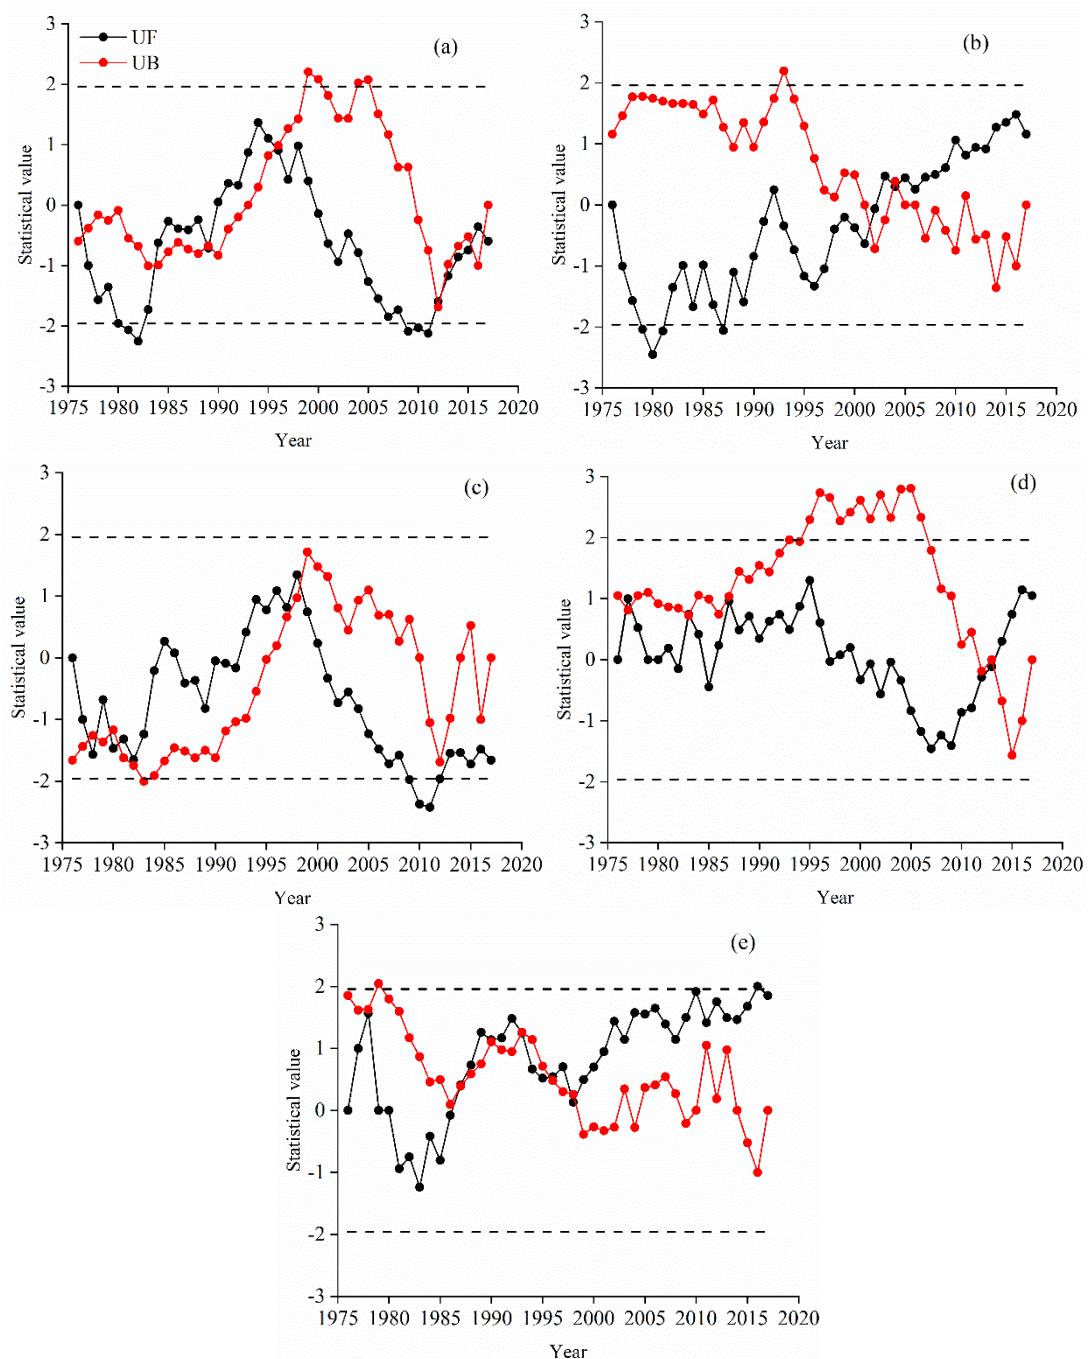

**Table S6** Precipitation change rate at 135 stations during 1976-2017 in the Mongolian Plateau

| Arid types       | Precipita-<br>tion /mm | Significant increase<br>( $P < 0.05$ ) |          | Not significant in-<br>crease ( $P > 0.05$ ) |          | Stable ( $P > 0.05$ ) |          | Not significant<br>decrease ( $P > 0.05$ ) |       | Significant decrease<br>( $P < 0.05$ ) |          |
