

Turbulent Deposition Flux of Ozone to a Managed Peatland

Tarek S. El-Madany, Katharina Niklasch and Otto Klemm

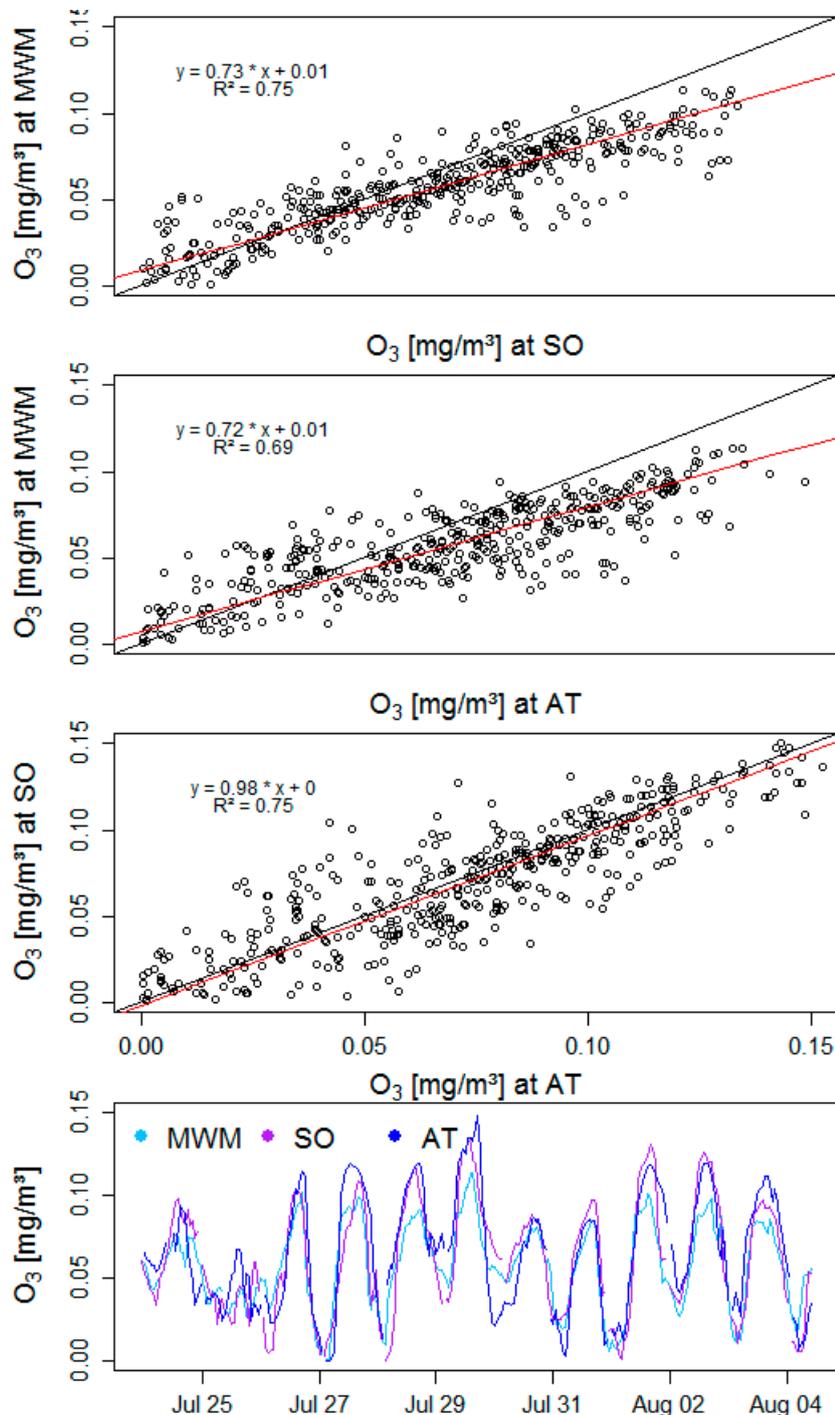

Figure S1. Scatter plots (1-3 from top) with correlation line (red), 1:1 line (black), linear fit, and coefficient of determination for the respective ozone concentrations. Top panel Allertal (AT) and Mittleres Wietingsmoor (MWM), second panel from top Südoldenburg (SO) and MWM, third panel AT and SO. The bottom panels shows time series of ozone concentrations at the three sites.
