† These authors contributed equally to this work.

Author Contributions: Wenxiang Pan, Baodeng Hou and Ruixiang Yang conceived and designed the methods and model; Jianhua Wang and Yong Zhao conceived the theory; Wenxiang Pan, Xuzhu Zhan and Wenkai Tian carried out the experimental observation; Wenxiang Pan, Baoqi Li and Yuyan Zhou analyzed the data; Xuerui Gao, Weihua Xiao and Jianhua Wang contributed analysis tools; Baodeng Hou and Ruixiang Yang wrote the paper. Wenxiang Pan and Baodeng Hou contributed equally to this work and should be considered co-first authors.

Acknowledgments: This research was financially supported by the National Natural Science Foundation of China (51509267, 51625904, 51779271 and 51409275) and the IWHR Research & Development Support Program (WR0145B622017).

The reasons for these changes are as follows. When Xuerui Gao worked in China Institute of Water Resources and Hydropower Research, he worked in the same research group as the other authors. When he was transferred to Northwest A&F University, he and his master's student Wenxiang Pan continued to engage in and contribute to the research. Therefore, it was an oversight not to have included them on the original paper and we are pleased to recognize their input and add their names to the author list. We would like to apologize for any inconvenience caused by these changes.

The manuscript will be updated and the original will remain online on the article webpage, with a reference to this Correction.
