Table S1

Table S1. The climate zone classification method of Köppen using temperature and precipitation and the ratio of area corresponding to each climate zone over Asia monsoon region. ($T_{min(max)}$: monthly averaged minimum (maximum) temperature, P_{min} : monthly averaged minimum precipitation, PANN: annual averaged precipitation, $P_{smin(smax)}$: minimum (maximum) precipitation in the summer season, $P_{wmin(wmax)}$: minimum (maximum) precipitation in the winter season, and P_{th} : dryness threshold calculated as a linear function of regional temperature).
