

Supplementary Materials: SPI Based Meteorological Drought Assessment over a Humid Basin: Effects of Processing Schemes

Han Zhou and Yuanbo Liu

Table S1. Characteristics of the meteorological stations.

Station	Station Code	Latitude North	Longitude East	Elevation (m)
Xiushui	57598	29.0333	114.5833	146.8
Yichun	57793	27.8000	114.3833	131.3
Ji'an	57799	27.0500	114.9167	71.2
Suichuan	57896	26.0333	114.0500	126.1
Ganzhou	57993	25.8667	115.0000	137.5
Boyang	58519	29.4833	116.6833	40.1
Jingdezhen	58527	29.3000	117.2000	61.5
Nanchang	58606	28.6000	115.9167	46.9
Zhangshu	58608	28.0667	115.5500	30.4
Guixi	58626	28.3000	117.2167	51.2
Yushan	58634	28.6833	118.2500	116.3
Nancheng	58715	27.5833	116.6500	80.8
Guangchang	58813	26.8500	116.0333	143.8

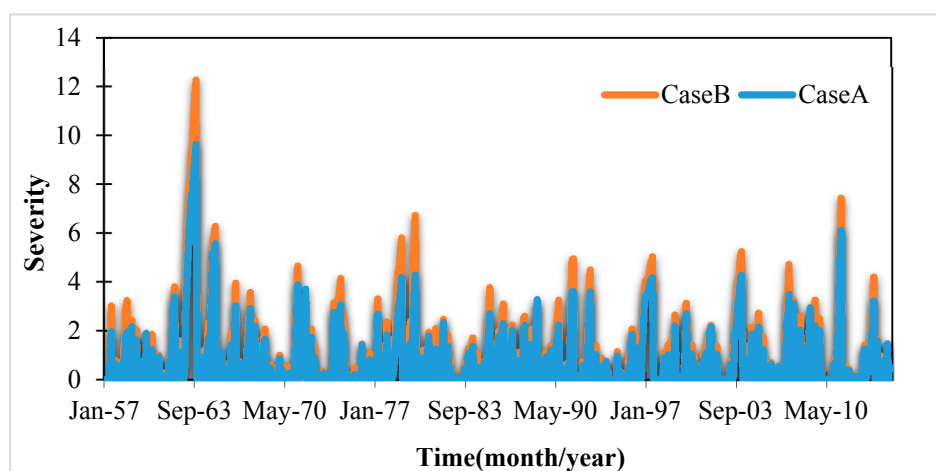

Figure S1. Time series of drought severity obtained with two different processing schemes for the Poyang Lake Basin in 1957–2014.
