

Supplement S5

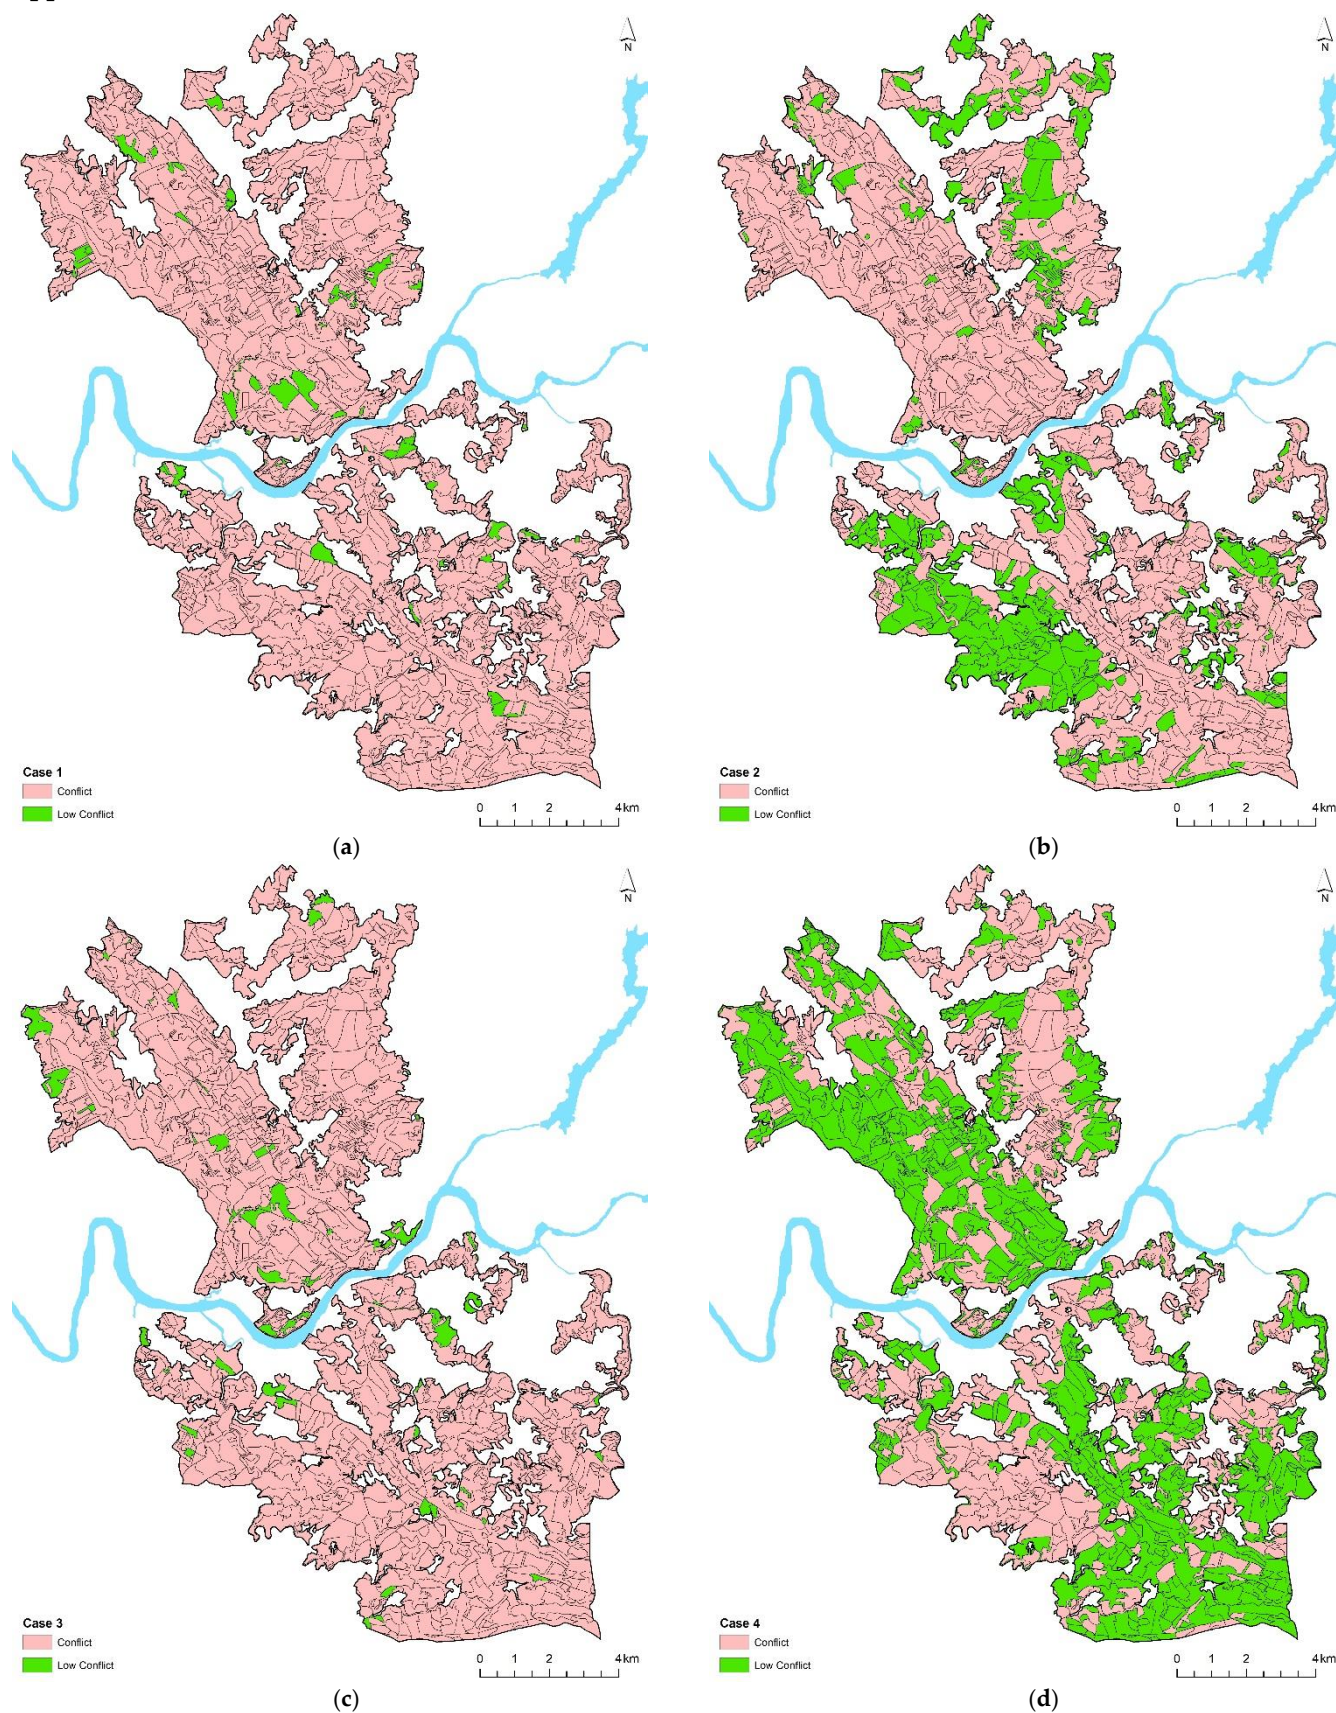

Figure S5. The four cases of NetWeaver logic model: (a) case 1, the priorities of forest owners and public administrators are basically compatible; (b) case 2, high priority in only civil society and any other group's high priority is a potential conflict; (c) case 3, high

priority in only market agents and any other group's high priority is a potential conflict; (d) case 4, no group rates the priority high or very high in a management unit.
