Table S1. Kruskall-Wallis test on pH, amounts of total organic C (TOC), carbonates (CaCO_3), sand, silt and clay, water content at field capacity (FC), bulk density (BD), soil electrical conductivity in non-irrigation winter period (ECew) and in irrigation summer period (ECes) of superficial and deep layers according to soil classification. Different letters mean significant differences ($p<0.05$)

Superficial layers (0 – 30 cm soil depth)
