

# Supplementary Martials: Peptidyl Transferase Center and the Emergence of the Translation System

Savio Torres de Farias, Thais Gaudêncio Rêgo and Marco V. José

**Figure 1.** Two different perspectives of the superimposition of the docking experiments between the *T. thermophilus* Peptidyl Transferase Center (PTC) (salmon) and tRNA<sup>Gly</sup> (blue), tRNA<sup>Arg</sup> (green), and tRNA<sup>ASP</sup> (yellow) anticodon loop, with rotation of 180 degrees between them.
